Α

**T** O those who open the volume of history with a view to improve their understanding; who are competent to carry their refearches beyond the external appearance of events, and to fpeculate on the concealed caufes which produce the elevation, or accelerate the decline of empires, there is not, perhaps, in the annals of time a period more pregnant with political matter, than the one which has elapfed between the year 1780 and the prefent time. In that fhort interval, we have feen the British Empire, which had embraced both hemifpheres, and to which India and America were only provinces : R

vinces: which had fuccefsfully oppofed, under the aufpices of the late Earl of Chatham, the combined force of the Houfe of Bourbon, and, after giving laws to Europe, had difpenfed peace to mankind : we have feen this empire fhaken to its bafis, convulfed at home, and affailed on every fide; vainly invoking the aid of that perfidious Princefs, whole fleets we had conducted into feas unknown to her barbarous fubjects, and whofe victorious banner we had taught to fly on the fhore of Greece and of Afia Minor. It was from her ungrateful hand that England, already bending beneath the complicated calamities of domeftic division and of foreign war, was deftined to receive the final blow, which unnerved our arm, and compelled us, reluctantly, to affemble our distant legions for the protection of the capital, and the prefervation of our existence. It is unnecessary to fay, that I allude to the "Armed Neutrality;" a meafure which originated from the cabinet of Catherine the Second, although it was

followed

(2)

followed by all the Baltic Powers: and the retribution due to which, however long delayed, is now probably near its accomplifhment. But we have not only feen the British monarchy, in common with other states and kingdoms, oppressed by enemies, and finking under the weight of adverse fortune, or pufillanimous and feeble counfels: we have feen this expiring and diminished empire (unlike to every other, and in this diffimilarity laying the ftrongeft claim to the admiration of mankind), within the tranfitory period of only ten years, rife from a state of humiliation and depression, readjust her fcattered infignia. refume her ancient luftre, and wing a fublimer flight than the had ever held acrofs the political expanse. It is in vain that the most laborious refearch would endeavour to parallel this extraordinary renovation in the hiftory of modern Europe. It is only in the Athenian or Roman Annals; it is only at the fatal periods of Marathon, and of Cannæ, that we fee any example of a B 2 republic

republic fuddenly and rapidly emerging from the loweft point of ruin and calamity, into greater power and grandeur than fhe had previoufly enjoyed.

The Auftrian Eagle, which, under Charles the Fifth and Ferdinand the Second, had foared fo high, and which had even nearly extinguished all the Germanic liberties; ftripped of its plumage by Gustavus Adolphus, and chained to the earth by the manacles which were imposed on it at the Treaty of Westphalia, long flumbered in peaceful bondage, 'till Marlborough released the Imperial captive, and once again restored it to freedom, though not to its former greatness.

Spain, which under Philip the Second had menaced Europe, and feemed almoft in poffeffion of her inordinate projects of ambition; which fitted out her invincible Armada for the fubjection of England, while the prepared to place an Infanta on the throne of France: Exhaufted by her own perpetual efforts, and having drained the treafures of the new world, in vainly attempting to

7

to reduce a revolted province, funk at once into impotent infignificance; and now, after the lapfe of two hundread years, appears to be only flowly emerging from poverty and weaknefs.

Sweden, which like a torrent overran Poland, Saxony, and Denmark, at the commencement of the prefent century ; and which, conducted by the frantic valour of Charles the Twelfth, appeared ready to plant her triumphant standards on the walls of Mofcow, was hurled in a fingle day from the zenith of power and glory. All her laurels withered at Pultowa: and fince that memorable æra, her melancholy and steril annals contain nothing which can awaken curiofity, or intereft mankind, though more than feventy years have elapfed fince Charles explated his wild and deftructive projects of ambition under the walls of Frederickshall. At the moment when I am writing, a Prince, emulous of the fame of Gustavus Adolphus, and adorned with qualities which, in a more fortunate period, might have have reftored the drooping genius of Sweden, and re-inftated her in those provinces which she has lost, is endeavouring to supply the inherent deficiencies arising from the impoverished and depopulated state of his dominions, by perfonal fortitude and ability. He has even made an effort not inglorious, to check the Russian progress, and to affert the ancient pre-eminence of his fceptre in the Baltic. These, however, are feeble attempts, and ferve rather to remind us of what Sweden once was, than to awaken any well-grounded expectation that the can again refume her former fituation in Europe.

Even France, the favoured country of nature; bleffed with a happy diverfity of climates; enriched with the choiceft and most delicate productions of a luxuriant foil; embracing the Atlantic and the Mediteranean feas; formed for empire, for dominion, and for fuperiority among the European kingdoms; uniting in herfelf every natural advantage which industry can bestow, or commerce can procure; inured inured to habits of obedience and loyalty. as well as trained to conquest and to war : France herfelf, after the fevere chaftifement which Louis the Fourteenth, towards the conclusion of his reign, received from Eugene and Marlborough, remained almost fupine and torpid during thirty years which fucceeded the Treaty of Utrecht; content to cultivate the peaceful olive, and opprefied under the load of public debt, which the infatiable and ruinous ambition of her fovereign had incurred. It was not 'till Marechal Saxe awoke her dormant genius, and revived in his perfon the fublime talents which have equalled him with Condè and Turenne, that France, in any measure, refumed her afcendant, or feemed again to occupy her natural pre-eminence among the states of Europe.

It cannot be more curious to enquire, than it must be instructive to ascertain, whence has arisen this characteristic, and peculiar principal of resuscitation, if I may be allowed the expression, which, in a short a fhort fpace of time, has raifed England from her depreffion; and has enabled her, unlike the other furrounding monarchies, to profit of her very misfortunes, and to engraft fplendor and power upon her loffes and defeats.

Where are we to fearch for this vivifying fource of renovation? Is it in her fpirit of commercial enterprize; in her undiminifhed industry; in her numerous and ingenious manufactures, which have penetrated into almost every province of the civilized world? Doubtlefs, these causes have contributed much to extricate and to restore the nation; but, efficacious and falutary as their tendency and operation are, they cannot be confidered as adequate to fo great a work.

It was requifite that Providence fhould extend its tutelary care, to prolong the life and reign of a Prince, inexpreffibly dear and neceffary to his people; whofe experience, matured by years and chaftened by adverfity, might, and could alone be equal to the arduous tafk of felecting from among among his fubjects, those who from capacity and virtue were competent to heal the wounds, and reftore the energy of the commonwealth. It was requifite that a minister should arife, who, to incorruptible integrity, and unblemished manners, should unite strength of mind, fevere æconomy, vigilance which never fleeps, eloquence to captivate, and vigour to fubdue. Rare, and almost unexampled combination of endowments, conferred by Heaven on those, and on those only, whom, in her wife difpenfations, fhe destines to fustain, and reftore a finking monarchy! Yet fuch a minister, may it be afferted without flattery, has this age and country feen. Such an administration have we already enjoyed during near feven years; and to it may be justly afcribed those aufpicious and happy events, which the prefent age regards with mingled wonder and admiration, and which will be long commemorated by a grateful posterity.

To trace the gradual progression from the darkness of 1780, to the bright fun-C shine

fhine of the prefent moment : to pourtray fome of the leading characters and events, which have fucceffively marked and diftinguished the intermediate time: to defcribe that ftormy and tempestuous period, which, during two years, shook the cabinet, the palace, and the throne, till in 1784, the prefent minister, after a long and painful fruggle, advanced into open day, and commenced his brilliant career: to mark the principal and most difcriminating features of his domestic government, and foreign policy : to take a general and rapid furvey of the caufes which have involved the monarchy of France in anarchy, and which feem to threaten that beautiful portion of Europe with all the horrors of civil war, of bloodshed, and of bankruptcy: finally, to deduce this interesting feries of events from the period at which I have commenced, to the time when 1 fhall lay before the public the picture which I am now defigning: thefe are the objects of the prefent attempt. Ι am fenfible of all its difficulty and deli-

cacy,

cacy. I know how dangerous it is to hold up even truths to the eye of prejudice, or of party; and how reluctantly we allow the veil to be withdrawn from before the political fanctuary, when we are interested in its concealment or its defence. I feel how invidious is the tafk of appreciating the motives and actions of our cotemporaries, our friends, and our fellow citizens. I am not infenfible, above all, of my own incapacity to treat of matters yet recent, and obfcured by the paffions and interests of the great actors themselves. But, great as thefe impediments are, they cannot induce me to relinquish my defign. What narrative can be fo inftructive, or fo interesting to the prefent age, as the hiftory of the prefent age? " Veteris populi " Romani, prospera, vel adversa, claris " fcriptoribus memorata funt :" Of the laft ten years, no sketch has yet been offered to the public. It will be my province, " fine ira et studio, quorum causas procul " habeo;" with as much impartiality as the fubject itself, and the infirmities of C 2 our

our nature will admit, to delineate the events which have paffed in fucceffion bebefore us, fince the difaftrous period where the prefent memoirs commence.

The British empire, which only a few years preceding that æra had appeared to be fo elevated and durable, then exhibited a melancholy and instructive lesson of the mutability of human greatnefs. Civil war, which had commenced its deftruction, was aided by a combination of the first European powers to compleat its fall. Her fleets and armies, accustomed to conqueft, retreated before the navies of France and Spain. Her fhores, fo long unufed to hoftile invafion. were threatened and infulted. Her finances groaning beneath new and annual loans, conducted upon injudicious or ruinous principles, feemed to approach that point, beyond which public credit cannot exift or furvive. Difcord raifed her flaming brand in the capital, the fenate, and the cabinet. London, fcarcely efcaped from conflagration and pillage, looked. forward to a general fufpenfion of commerce,

merce, and to national infolvency, as imminent and almost inevitable. Clamour and difcontent filled the kingdom, and characterifed the affemblies of the people in the different counties. Ireland, difdaining all further appeal except to the fword, and treading in the traces of America, armed her fubjects, not fo much for defence and protection, as for the purpofes of emancipation from the yoke of England. In the British Channel, once facred from foreign intrusion, the islands of Jerfey were repeatedly attacked. Spain, which had already re-united Minorca to her crown, held Gibraltar befreged, and meditated the conquest of the Floridas. Every month brought accounts of the diminution of the West India Islands, which fucceffively fell into the hands of France; while Jamaica, left almost to her own internal capacities of defence, expected with trembling folicitude the long meditated invation by the united fleets of the Houfe of Bourbon.

In India, Hyder Ally, the fcourge of the

the British nation, aided by the arms of France, was on the point of exterminating and expelling us from our most ancient possession. Madras was menaced by famine, as well as by war; while Bengal itself fcarcely fustained the pressure of the Mahrattas; and the vast fabric which Clive had cemented with a profusion of European and Assistic blood, was ready to crumble with as much rapidity as it had been originally constructed.

In America, the names of Clinton and Cornwallis had fucceeded to thole of Howe. New armies had occupied the pofts of their victorious, but departed predeceffors. The war which had long blazed in the midland provinces, was then principally transferred to thole of Carolina and Virginia. Ufelefs trophies and barren laurels appeared to be the only advantages, which we were deftined to derive or acquire. Impenetrable woods and impaffible moraffes, in the centre of which freedom had difplayed her banner, perpetually baffled all the exertions of valour, lour, military fkill, and perfeverance. England began to awake from her dream of fubjugating the Thirteen Colonies, and already meditated the dereliction of that ruinous and expensive undertaking; while her pride, her honour, and her indignation ftill propelled her forward, and amufed her with hopes of fucces, which constantly vanished at a nearer view. Like the Roman empire under Gallienus, that of Britain seemed to approach the period of all its glories, and to be menaced with impending and total fubversion.

From this gloomy and dejecting picture of foreign affairs, it may be judicious to pafs to a more animated, if not a more exhilerating fcene; that which was exhibited at home in the two houfes of Parliament. The principal figure which here prefented itfelf, was the first minister, Lord North, struggling against a host of enemies, and slowly retreating before them, while they pressed forward with loud and repeated clamours. A thousand javelins hung upon his

his political buckler, the points of which were continually broken and turned afide by his urbanity, his ready and pleafant, wit, or his able and ingenious reafonings, when fufficiently flung by the reproaches which were heaped on him, to awaken and to roufe his torpid parts. Inur'd to the habits of parliamentary debate, master of all the science of ministerial evafion or defence: though deftitute of energy and coercion of character, yet eloquent, mild, perfuafive, and bleffed with an almost infuperable tranquillity of temper, he patiently faw the ftorm exhaust itfelf; and looked round, ferene and placid, to that powerful phalanx, which, long accuftomed to obey, still closely adhered to him under every circumstance of public diffrefs, and never abandoned him in the hour of neceffity. Even the lethargic and foporific qualities of his body, as they frequently prevented him from either hearing or feeling the invectives of oppofition, in fome measure difarmed and blunted their edge; while flumbers, which fo

fo often fly the couch of princes, not unufually vifited Lord North amidst ail the din and tumult of the Treafury Bench. Near him fat the American Secretary, Lord George Germain ; whole more irritable nerves, and more communicative or unguarded character, afforded materials and fcope for continual attack. Gifted with extraordinary natural endowments, though little cultivated by polite letters, or adorned by fcience; active, perfevering, decifive, and capable of conducting the greateft affairs of state, he was yet purfued by the fame fatality which had blafted his early profpects of greatnefs. Unfuccefsful in age upon the plains of America, as he had been unfortunate in youth upon those of Germany, he vainly invoked an exhausted nation, and a difcontented Parliament, to continue a war, which, however just and necessary in its origin, had become odious and ungrateful, from a long feries of ill fuccefs. Loyal to his Sovereign, pertinacious in his favourite meafure of fubjecting America, D and

and conceiving his own political fituation infeparably connected with the final fuccefs of that attempt, he adhered inflexibly to it, and regarded its profecution as a facred principle, from which no obftacles could induce him to recede.

Mr. Ellis, who for near half a century, fince the times of Walpole and Pelham, had occupied a place under Government, continued to retain his ancient corner on the Treafury Bench; while Mr. Dundas, whofe pliant and verfatile talents have adapted themfelves to almost every Administration, and whose abilities are calculated to ftrengthen and fupport any, was feated nearer to the centre of action, and boldly prefented himfelf at the poft of danger, whenever the enemy attempted to ftorm the outworks. His friend and companion Mr. Rigby, still enjoyed the ample revenue of the Pay Office, without a partner; and in the exceffes of a voluptuous table, of wine and conviviality, drowned the recollection of tirefome debates, and more difgraceful defeats.

The

The two great luminaries of legal knowledge, Thurlow and Wedderburne, who had long occupied and adorned their feats on the fame fide of the houfe, had been fucceffively raifed to the honours of the peerage; and their empty places were filled by others far inferior in energy, dignity and capacity. Such was the afpect of ministry at the period to which I allude. On the other fide of the houfe, Mr Fox led on the bands of opposition in close and well conducted files, while Mr. Burke charged at the head of his irregular fquadrons, and carried terror into the ranks of administration. Dunning, in defiance of nature, deftitute almost of organs of articulation, monotonous and difgufting in his tones, ungraceful in his figure, poffeffing no external advantages, and unadorned by any factitious circumstances of birth and alliance; yet, under all thefe impediments, arrefted the judgment, charmed the ear, and captivated the imagination, by the ftream of his eloquence : though it fometimes flowed through the channels of D 2 law.

law, it was always bright, clear, and lucid. Keppel, Conway, Howe, and Barrè occupied their refpective ftations in this formidable and augmenting body, and aided the general attack upon the feeble and difinayed adherents of the minifter.

Suftain'd by the purity and integrity of his intentions; repofing on the efteem and affections of his people; and bent on the profecution of a war, which, however unfortunate in its conduct, was founded in the just rights of his throne, no fymptom of change or alarm was to be traced in the fovereign. At no period of his reign were his fortitude and magnanimity put to fo fevere a teft, and at none were they more unfhaken. Equanimity, ferenity, and dignity appeared in his features, and pervaded his manners, even in moments of the most acute perfonal fuffering. That piety, and that refignation to the difpenfations of Providence, which has always formed fo diffinguishing a part of his character, eminently gilded the gloom of this melancholy portion of his reign, preceded and

and followed by fcenes of profperity and glory. Such was the fublime and affecting fpectacle which George the Third exhibited to mankind, amidft the convulfions of every kind which menaced his domeftic tranquillity, diminifhed his empire, and attacked him with augmenting violence.

To the limited and erringeye of man, incapable of pervading futurity, and of removing the darknefs which furrounds it, Louis the Sixteenth then prefented a very different and a much more enviable figure. Fortunate in having fucceeded to a prince, who was funk in diffolute pleafures, and loft to all public exertion before his reign expired, he afcended the throne of Henry the Fourth, under every flattering circumstance of youth and of profperity. His want of any eminent talents feemed to be amply compenfated by æconomy, application, decorum of manners, and, above all, by a felection of wife and able ministers. A fuccefsful war, which eclipfed and obliterated the difgraces and defeats, fuftained

tained by France in her last rupture with England, endeared him to a loyal and affectionate nation, characterifed for ages by its predilection and attachment to its monarchs. A Queen, diftinguished by endowments of mind, of manners, and of perfon, not lefs than by her high rank and imperial defcent, had formed the bond of connexion between the Houfes of Bourbon and of Austria, while the rendered Verfailles the refidence of pleafure, gaiety, and magnificence. France appeared to re-afcend in the fcale of Europe, in the fame proportion as Great Britain declined; and flattery, if not reason, already predicted the revival of the proud age of Lewis the Fourteenth. But, to confound the fpeculations of policy, and to evince the hafty transitions of human greatness, it was precifely at this very juncture that the feeds were fown, which we have fince feen matured; which have already overturned the very elements of order and government, stained the palace of Verfailles with blood, and menace the extinction of property,

property, perfonal fecurity, and every thing dear to mankind. The troops who were fent as auxiliaries to the rebellious provinces of Great Britain beyond the Atlantic, fpeedily imbibed that fpirit of freedom, which they were commanded to defend; and did not relinquish these fentiments fo incompatible with abfolute monarchy, when they returned to their native country. On the other hand, the anticipation of the public revenue, which was neceffarily produced by a war, however glorious and fuccefsful, added to the immoderate expences of a diffipated and luxurious court, foon reduced the King to adopt a meafure, which though difinterested and even patriotic, opened the way to shake his throne. Louis the Sixteenth was perfuaded to break the royal houfehold, to difmifs about four hundred officers holding posts immediately about his perfon, and to content himfelf with a lefs expensive and splendid establishment. Perhaps no advice more replete with calamity, could have been conceived or followed.

lowed. The pomp and external paraphernalia of majefty being once withdrawn; and the numbers of nobility attached to the fovereign by intereft, vanity, or affection, being once difbanded, the throne was left naked, unprotected, and expofed to infult. Experience has evinced its deftructive tendency; and has fhewn that only a limited monarch, who reigns in the affections of his fubjects, and whofe interefts are intimately blended with those of his people, can remain an object of respect and homage, divested of the fplendor and protection of a royal court, and numerous household.

The Empress Queen, Maria Therefa, clofed at this period a reign of forty years, marked by the most striking vicifitudes of prosperous and of adverse fortune. During the existence of the powerful combination which shook her throne in the commencement of her life, she exhibited the most undaunted magnanimity, the greatest refources of mind, and a courage superior to her fex. Driven from Vienna in 1741, while

while Bohemia and Auftria were over-run by the French and Bavarians, fhe found protection and fuccours in the loyalty of her Hungarian fubjects, who at fight of her beauty, youth, and misfortunes, forgot their hereditary enmity and jealoufy of the Imperial house from which she fprung. The afternoon and evening of her reign, though frequently diffurbed by foreign wars, were paffed by her in the difcharge of every duty due from a fovereign to Mild, clement, humane, her people. munificent, and ever extending the proofs of her parental tendernefs to her wide extended dominions, fhe was idolized by the Hungarians, beloved by the Flemings, and dear to every order of citizens. That piety and fortitude which had characterized her life, accompanied and brightened her dying moments. Her crowns defcended to her fon Jofeph; a Prince who had given premature expectations of genius and capacity, and whofe emulation of the King of Pruffia promifed to render him worthy of fo great an antagonift. But Eu-E rope

(|25|)

rope was foon undeceived in this favorable anticipation of the talents of Joseph the Second. Agitated with perpetual and varying fchemes of conqueft : reftlefs, and incapable of repofe : planning innovations in religion, in manners, and in civil life, which were no fooner executed than revoked : oppreffive and defpotic, without the art either of concealing these qualities, or of rendering their effects palatable to his fubjects: menacing at the fame moment the just franchifes of the Netherlands, and the antient liberties of Hungary : dreaded in the empire, and detefted in his own capital : anxious to enlarge the limits of his dominions, even at the expence of faith and justice : rapacious of ecclefiastical property, and profuse only of the blood of his people; Jofeph foon alienated the affections of every rank, and clofed a tempestuous reign, unregretted, and unlamented ; leaving the Houfe of Auftria in embarrafsments, produced by his violence and ambition, fcarcely inferior to those which had fo nearly overturned and extinguished it,

it, at the death of his grandfather Charles the Sixth.

Two illustrious and extraordinary Princes then filled the thrones of Mufcovy and of Pruffia. A woman was still deftined to fway the fceptre of the Czars, and to govern the immenfe regions extending from the Frozen to the Cafpian Sea. Unequalled in magnificence, and unconquerable in war, Catherine the Second had enlarged the limits of her vaft dominions, covered the Black Sea with Ruffian fleets, and threatened the entire fubverfion of the Ottoman power. Protectrefs of the fciences and liberal arts, fhe cultivated the friendship of d'Alembert, courted the correspondence and the praifes of Voltaire, and, like Louis XIV., extended her munificence to men of letters throughout every kingdom of Europe. Intoxicated with fuccefs, and elevated to the fummit of human grandeur and felicity, fhe forgot the friendly hand which had aided her arms, and taught them the way to victory; while dreaded and admired in every quar-

E 2

ter

ter of the globe, fhe feemed to have chained the inconflancy of fortune, and to defy the changes and clouds which fo frequently darken the conclusion of a female reign.

Frederic, covered with laurels, and retired from Berlin to the folitary magnificence of Potzdam; in the bofom of literary repofe, and finking under the preffure of augmenting infirmities, advanced towards the termination of his memorable life and reign. Alienated from, or indifferent to the misfortunes of England, he regarded with a philofophic and averted eye her prefent unequal conteft againft fo many powers; and extended no relief, nor made any exertion in fayour of his antient ally.

Portugal alone, among fo many neutral, or hoftile ftates, ventured at this diftrefsful moment, to give fome affirmative marks of friendship to the crown of Great Britain.

While Europe exhibited this afpect, fo little calculated to awaken hope, fresh loffes loffes and defeats awaited the arms of England beyond the Atlantic. The capture of the Ifland of St. Euftatius, which, on its first promulgation, had diffused a general joy throughout the nation, produced in the event only obloquy to the captors, and a fuspension the most untimely and injurious in our naval and military exertions; while the troops, which should have acted with vigour against the enemy. were funk in inactivity, or occupied in plunder.

As the year advanced, new iflands were loft, and new difgraces incurred; 'till the climax of national calamity attained its ultimate point by the furrender of an army of feven thousand men, who laid down their arms before Wathington and Rochambeau, on the shore of the Chefapeake. After fix years of mutual flaughter and alternate success, the genius of America triumphed, and this last unexampled victory for ever confirmed her independence. The intelligence, when it was received in England, shook the already tottering Administration, and precipitated its fall. Difmay,

Difmay and terror pervaded the cabinet, and agitated the counfels. The Oppofition, confcious of the augmenting diffrefs and fluctuating irrefolution of the first minister, called aloud for an explicit avowal of his renunciation of any further efforts to fubjugate the revolted colonies. The expreffive filence of Lord North to thefe peremptory demands, left no room to doubt either of his fentiments or his wifhes: and the Secretary for America, retiring from a fituation no longer tenable, after a rude attack from Lord Carmarthen, was received into the quiet bofom of the Houfe of Lords. The enemy rushed into the breach which this difunion had occafioned, and already beheld the prize within their grafp. The Administration, however, ftill lingered, though deftitute of animation or energy; a feeble and ineffectual effort was even made to prolong their exiftence, by the fubffitution of Mr. Ellis in the place of Lord George Germain; but this ftep ferved only to accelerate their diffolution. Opposition, eager to feize the prey, and acquiring

quiring force as they advanced, pushed on towards the citadel; 'till Lord North, on the 20th of March, 1782, exhibited the fingular and humiliating fpectacle of a First Minister divesting himself of all the infignia of office, before a crowded Houfe of Commons; and announcing his refignation to an aftonished audience, who fcarcely credited the fact of which they were witneffes. The novelty and effect of this extraordinary furrender of power, were encreafed by its being equally fudden and unexpected. Neither his friends nor his enemies were aware of the blow; and even his fovereign did not fufpect, 'till almost the very instant in which he executed his purpofe, that any fuch was meditated or intended. It is nugatory and unneceffary here to enquire, whether it was principally produced by timidity, fatigue, or difgust. Probably, by a combination of all thefe emotions; and unqueftionably by a very unforefeen and hafty determination.

In this difarmed and unprepared fituation, without either time or ability for framing

framing a new ministry, the King could only furrender at difcretion. He did fo; and the royal garrifon, entered by ftorm, was plundered by the conquerors. Three garters were found among the fpoils, and which ferved to decorate the principal chieftains. Offices and pofts were diftributed at their arbitrary pleafure ; and a new Administration foon appeared, composed of motley materials, and evincing in its very formation and component parts, the principles of fpeedy diffolution. The feeble genius of Lord Rockingham prefided over it, but could infpire no heat or energy into the heterogeneous mafs. III calculated for fo arduous and delicate a station, he wanted talents to guide, and animate the complicated machine of which he was only the oftenfible leader. Mr. Fox and the Earl of Shelburne occupied the two Secretaryships of State; while Keppel, raifed to the peerage for his fervices on the 27th of July, 1778, fucceeded to the prefidency of the vacant Board of Admiralty.

It is not my intention minutely to delineate

heate or depicture the measures of this transitory Administration, just shewn to the British, as Marcellus was to the Roman people; and fnatched away by an extinction as hafty, but not as much lamented. I have ever regarded the fhort period of its duration, as the last and lowest point of national and royal depreffion. Though illuminated by a victory, which has fhed an unexampled luftre over the annals of England, no ray of it reflected upon the Ministry : they had vilified and perfecuted the great naval commander who obtained it, previous to his departure for his station : they recalled him in the very moment of his conquefts. The annals of that period, circumfcribed within three months, are marked by the humiliating and fruitlefs attempts of the Government to obtain peace from Holland; though illufory promifes and affurances of fuccefs had been held out to parliament, and to the country, by Mr. Fox, before his entry upon office. The peerage, in the almost only inftance where it was conferred, was extorted F

extorted from the fovereign, without even the decencies of refpect, or of requeft; and the extraordinary fpectacle of a newly-created Peer kiffing the King's hand in the Queen's drawing room, in violation of all form or ufage, was referved for the Rockingham Administration to exhibit, in the perfon of Sir Fletcher Norton.

A bill, which without materially conducing to national æconomy, or public benefit, diminished on one hand the dignity which used to wait upon the perfon of the fovereign; and on the other, difarmed every fucceeding minister, by leaving him fcarcely any objects with which to ftimulate activity, or reward merit and adherence. A bill, which by compelling every Administration, from want of offices, to multiply the peerage, as the only thing left in their power to beftow; and which, if not redreffed and repealed; may eventually deftroy the balance of the conftitution. A bill, well known, and as well

( 35 )

well characterized by the name of its eloquent, but theoretical and visionary author, was introduced, and rapidly carried through the unrefisting Houses of Parliament; while the King was compelled to lend his name and aid to the completion of a law, which difbanded his houshold, and difarmed his authority.

This unwife and impolitic attack upon the majefty of the throne, was properly accompanied and fucceeded by fimilar invations of the hereditary franchifes of the people. Under the fpecious allegation of extinguishing the corrupt influence of the Crown, a great and industrious body of men, the officers of the customs, were deprived of their just and unalienable right to vote in elections for their reprefentatives in Parliament; and the natural reward of merit or fervices was converted by the Legislature, into an inftrument of punishment and privation.

But, happily for the monarch and for the nation, a Ministry, in which hypocritical profession was substituted for action; F 2, whose

whofe conquests were limited to St. James's, and whofe trophies were only obtained over clerks of the Green Cloth and housekeepers, now drew near its ex-The natural decease of the tinction. Marquis of Rockingham, which took place upon the 1st of July, 1782, can fcarcely be faid to have preceded, or anticipated his political difmiffion. He expired in the vicinity of London; regretted only by his immediate friends and adherents : effeemed as a virtuous and a well intentioned, though an inadequate Minif-His elevation to the first post in the ter. Administration was injurious to his character as a man of talents; and he was twice deftined in the prefent reign, to fee the political fabrick which he had reared, moulder within a few months, and fink under its own preffure. Like Galba, " Major privato vifus, dum privatus fuit ; " et omnium confenfu, capax imperii, "nifi imperaffet."

Releafed by this interpofition of fortune, from a bondage equally fevere and humiliating, humiliating, the Sovereign made a felection from among his fervants, more confonant to his own perfonal inclinations, as well as more calculated to advance the public fervice. The Earl of Shelburne affumed the vacant Treasurer's staff, which had dropped from the hand of the deceafed Marquis; while the honeft and virtuous incapacity of the late Chancellor of the Exchequer, was fupplied by equal probity and integrity, but accompanied with those fublime and early talents, which Mr. Pitt alone has difplayed and fuftained in the prefent age. Having declined the proffered advances of the late Ministry, and having refused to form any inferior part of, or accept any fecondary fituation under that fystem, he now first appeared in the front ranks of government; and evinced to an aftonished nation, that in a post fo arduous as that of the fuperintendance of the complicated finances of an exhaufted and impoverifhed country, he could unite the energy and vigour of youth, with the maturity

.

maturity and experience of more advanced life.

Some fubordinate alterations in other departments of state completed the new Administration; which, at its commencement was favoured by the advanced period of the year and feffion, and the prorogation of Parliament which naturally followed. The adherents of Lord Rockingham filled the Lower Houfe with loud clamours and pointed infinuations, against the fuppofed motives and authors of a change fo inimical, as they afferted, to the best interests of the monarchy. Mr. Fox in a manly and magnanimous, Mr. Burke, in a querulous and reluctant manner, refpectively refigned their fituations. The impaffioned exclamations of the latter were only interrupted and extinguished by the arrival of the Black Rod, and the fummons to attend the Chancellor at the bar of the Houfe of Lords. The feffion clofed; and oblivion already drew her veil acrofs the departed Administration, while new convultions, and new fcenes of political confusion

( 39 )

confusion were filently, but rapidly, generating in the womb of time.

Peace, which for fo many years had fled, now prepared to return. Inactivity, and a premature fufpenfion of hoftility beyond the Atlantic, gradually opened the paffage to univerfal tranquillity in Europe. America, already declared independent by the Legislature, no longer occupied the arms or efforts of Great Britain. Holland, divided by the Orange and the Republican factions, feebly fustained her portion of the common attack. France, arrefted in the midft of all her conquefts by the arm of Rodney, faw her boafted navy fcattered over the Western world; happy to escape the purfuit of a victorious fleet, and to fink undisturbed, in the havens of Martinico, or of Boston. It only remained to humble the arrogance of Spain; who, infolent with unaccustomed fuccefs, and elated with the trophies acquired at Minorca, and in Florida, had affembled her forces of every kind round the rock of Gibraltar, and already anticipated the reunion

union of that proud fortrefs to her dominions. To indulge at once the gratification of national vanity, as well as the acquifition of glory, a Prince of the Blood Royal of France was invited to quit the effeminate pleafures of Verfailles, and to become a spectator of its reduction from the Spanish camp. Preparations only inferior to those of Philip the Second against Elizabeth, were made to accelerate and fecure fo favourite an object of the court of Madrid ; while all Europe might be faid, in common with the Count d'Artois, to have fixed their eyes upon this animating fpectacle. I need not relate the event ; infcribed in characters which must last as long as military fame and valour are revered among men. The formidable armaments of Charles the Third perifhed under the fuperior fire of the garrifon; and the miferable victims who refcaped from the conflagration, were indebted for their lives to the exertions of that very enemy, for whose destruction they had been affembled.

Under

Under this fingular blaze of glory and fuccefs was terminated a war, which had been marked during its progrefs with every circumstance adverse to England, and which, at many periods, had menaced its very existence. Negociations, prolonged throughout the autumn, produced a general pacification at the beginning of 1783; the terms of which, however widely different they were from those which Great Britain dictated at the treaties of Utrecht and of Fontainbleau, feemed neither ignominious ner difadvantageous, in the enfeebled state of the finances and refources of the country. France reftored almost all her acquifitions, while Spain retained her conquests; and Holland, which had tardily and reluctantly been forced from her pacific fyftem, was abandoned by her allies, and left to expiate by conceffions, the departure from her ancient policy and connexions.

But the waves of party, which had been fo long and fo violently agitated, could not immediately fubfide with the G extinction

extinction of hostilities. The two powerful factions, who had fucceffively poffeffed, and been deprived of the government, however adverfe they were to each other, yet united in their common opposition to the new intruders. The character of the First Lord of the Treafury, though diftinguished by many imposing qualities of mind, by ingratiating and popular manners, and by an enlarged acquaintance with the foreign interefts of England; yet wanted that ftamp of probity and principle, without which a great nation never confers efteem and confidence. Infincerity and duplicity were afcribed to him by his enemies. Accufations and fuspicions were circulated, poffibly originating only in calumny, which arraigned his purity of conduct as a Minister, and infinuated his acquifition of perfonal wealth by the abufe of his high fituation, during the progrefs of the late negociations, to the fordid purpofes of private gain. Doubts of this complexion, however unauthenticated or unjust they may be supposed, yet, by

by operating on the public, equally indifpofed them towards the peace, and towards its author.

To these obvious and oftenfible causes of his difmiffion, may be added the extraordinary and almost inexplicable indifference which marked his conduct, towards preferving a fituation, which it had been the leading and predominant object of his life to acquire. Parliament met, and after long and violent debates, renewed at various times, expressed its disapprobation of the peace recently concluded, though by a very fmall majority. It is even highly probable that this mark of their diffatisfaction would not have been attended or followed by any fuch affirmative proofs of national refentment, as to have compelled a Minister of firmness and rectitude to retire from his public fituation. Whether any consciousness of a deficiency in either of these qualities, or whether motives more concealed and unafcertainable actuated the Earl of Shelburne; it is certain that he did not hefitate to take the warning which G 2

which had been given him, and to lay down his office without delay.

But though he had embraced this pufillanimous and precipitate part, the Chancellor of the Exchequer, animated by feelings of integrity, loyalty, and duty to his Prince and to his country, generoufly refufed to abandon them to the refentments and difcretionary mandates of two factions, who had agreed to a mutual facrifice of principle, and even of decency, in order to gratify their thirst of power. After a manly and magnanimous, but ineffectual struggle, he was however compelled to yield to fo unequal a force. The Sovereign, who had vainly endeavoured to compose a new Administration, and who had been befieged in his own palace during fix weeks, found the lines of circumvallation too ftrong to force, and furrendered a fecond time prifoner of war. The two victorious chieftains, who had agreed to bury all paft caufes of refentment in oblivion, entered the breach in triumph, bound their captive, posted their centinels, and invefted themfelves in

in the fpoils which their conduct had acquired. The larger fhare however of thefe emoluments fell to Mr. Fox; and the Treafury was transferred from the mild incapacity of Lord Rockingham, whom death had removed, to the laborious, but limited and fubfervient talents of the Duke of Portland. Lord North, who did not feel with Cæfar, that "the first fituation " in a village out-valued the fecond in an "empire", was content with the inferior portion of power and profit, allotted him by the liberality of his new affociates, and mixed in the cavalcade, which he had fo long conducted. Too happy to obtain an amnefty for the misfortunes of his Administration, and foothed with the unaccustomed panegyrics of those who had fo lately called out for axes and fcaffolds; he funk without emotion, into a fubordinate office, and refigned the painful preeminence of state into hands of greater energy or ambition.

A paufe fucceeded to this extraordinary and eventful transfer of power; as the monarch

capable of inftantly exerting any effort for their emancipation. The "Coalition" imposed their fetters upon both; and little attentive to acquire the affection, were fatisfied with the fubmiffion of their prifoners. Relying on their own united ftrength to retain the conquests which they had made, they only began already to project the means of perpetuating and extending the term of their duration. To atchieve this object, it was indifpenfably neceffary to reconftruct the edifice which their injudicious fpirit of reform had lately overthrown; and to fubftitute other charges and offices in the place of those, which had been annihilated in the household of the Sovereign. Thefe pleafing anticipations and reveries formed a grateful occupation during the recefs of Parliament; and the fucceeding winter was defined to fee the chains, which an unprincipled ambition had fabricated, imposed with all the folemnity of legiflation upon an unrefifting people.

There

There is however a limit prefcribed to violence, which it has ever been found impracticable to pafs; and the "Coalition" was deftined to be taught by it's own experience, that no combination of talents, power, or ability can fustain a Government, where all opinion of principle, or refpect for character have ceafed to exist, on the part of the nation towards its tyrants. Even the forms of the conflictution and the fanctity of law will not prevent a generous and an enlightened country, from difcerning the abufe of that authority, which while it extinguishes prerogative, militates equally against freedom. Time alone was requisite to mature these reflections; and the Administration opened the way to their own destruction, by the very means which they had concerted for placing their greatness beyond the reach of accident.

Mr. Fox introduced his celebrated. "Eaft India Bill," with all that fplendor of parts, and difplay of ability, which has rendered him fo diffinguished in the hiftory

tory of the prefent age. Though India was not in that department of public bufinefs, over which as Secretary of State, he perfonally prefided, yet the fuperior energy of his character, and the convenient facility of his new colleague, allowed him to affume this arduous and dangerous pre-eminence. Mr. Burke's ample and inexhauftible flock of materials and documents, fupplied any deficiencies of memory or local information; while the " Inftitutes of Timur," and the wifest regulations of European policy, were newmodelled by this generous legiflator. The oppreffions and calamities under which India had fo long fuffered; the peculations, committed by the fervants of the Company, as well as the wanton and unprincipled wars in which they had engaged, were highly painted, and ftrongly reprobated. The remedy to thefe numerous evils was prefented; and all palliatives were deprecated, as unequal to the extermination of a difeafe which had pervaded the whole fyftem, which demanded a meafure of more than

than ordinary vigour in the Legiflature. The Houfe of Commons yielded to thefe convincing and ministerial arguments, fo calculated to operate on their paffions as well as their judgments. The ineffectual opposition which was made to it by Mr. Pitt, and a few perfons who adhered to him, neither retarded nor impeded the rapid progrefs of the bill. It was carried through one Houfe of Parliament by prodigious fuperiority of numbers; and it was not apprehended that the fubfervient underderstandings of the other House, generally difposed to fee all measures of all Adminiftrations with a favourable eye, would reject the prefent, or canvafs it with unufual feverity. The "Coalition" appeared already to touch the fhore, and to be near the accomplifhment of their moft fanguine projects of greatnefs.

The magnanimity and penetration of the Sovereign, awakened and directed by the timely exhortation of those who collected round the throne in this critical and dangerous conjuncture, fnatched the country H from

from the impending misfortune. The great incorporated bodies in various parts of the kingdom, flowly roufed to a comprehenfion of the evil, and alarmed at the violation of the chartered rights of the first commercial company in the nation, appeared ready to reclaim and to defend their own threatened immunities, or properties. London led the way in these symptoms of confternation, and was followed by the principal cities and provinces. Addreffes, remonstrances, and petitions, arrived from every part of Great Britain. Satire and ridicule, fo powerful in their operation upon the minds of men, united with reafon and argument to overturn a Ministry, who had attempted to conftruct their own grandeur, equally on the ruin of the Prerogative, and the destruction of the Constitution. Two caricature drawings, conceived with exquisite humour, and whose effect can perhaps be compared with nothing in our. hiftory, except the fong of "Lillabullero" under James the Second, were circulated in every company. In one of thefe, the Secretary

( 50 )

Secretary of State who had introduced the bill, was depictured carrying, like Atlas, the whole East-India House upon his fhoulders ; while the affrighted Directors, looking out of the windows, appeared vainly to invoke affiftance against the violence. The other reprefented his triumphal entry into Dehli, the capital of his newly conquered dominions. Mr. Fox was habited in the fplendid Afiatic drefs of Shaw Allum; while his obedient colleague in office Lord North, degraded to the inferior nature of the trained and managed elephant, fupperted the victor on his back. Mr. Burke, as a trumpeter, accompanied the proceffion, proclaiming the virtues and trophies of this fucceffor of Tamerlane and Aurungzebe.

The ftorm of national indignation, though long and tardy in forming, had now collected, and prepared to burft with the utmoft violence. The Houfe of Peers led the way, by throwing out the Eaft-India Bill; and on the fubfequent night, at a late hour, his Majefty fent to de-H 2, mand mand the feals of office from the two Secretaries of State. An Administration, at the head of which was Mr. Pitt, and of which he may be faid to have formed the vital principle, was inftantly composed. So fecure, however, were the late Ministers of their afcendancy in the Houfe of Commons, and in fuch contempt were thefe efforts of the Crown to liberate itfelf held by them, that when the writ was moved for Appleby, in confequence of the new First Lord of the Treasury having vacated his feat, it was received with loud, and almost general laughter. Even those whofe judgment and experience in Parliamentary matters were most respected, ventured to predict that a few weeks would fee the termination of this fugitive Government, either by a gradual or a violent death. For the first time fince the acceffion of the houfe of Brunfwick ; perhaps it may be faid fince the exiftence of the . monarchy, the fovereign and the people were united in opposition to the representaof the people. The patient and tiyes paffive

paffive fortitude of Mr. Pitt fuftained him, even more than his talents or integrity, during near three months that this fiege continued; nor did headvife his Sovereign to have recourfe to the last constitutional meafure left him, that of diffolution, till above a hundred and twenty addreffes, couched in terms of loyalty, and of reprobation against the attempt to overturn the prerogative, left no room to hefitate on its popularity, or on the general joy with which it would be received. The elections for the new Parliament, which at no period of the prefent century were ever fo incorrupt, and fo free from all ministerial interference. evinced beyond difpute, how odious to the nation were the principles and conduct of the late Administration. The First Minister emerged at length, from a state of the most painful exertion and depression, into political day; and the reins of Government, fo long and fo violently retained by the "Coalition," fell from their hands. It is from this æra that we may date the flow, but progreffive elevation of the Britifh tifh empire; which, fhaken and convulfed, during the calamitous period of the American war, had not been lefs agitated by internal ftruggles of faction, fince its termination. But, before we arrive at that exhilerating fcene, it may be a not lefs inftructive, though it is a lefs pleafing tafk, to furvey the picture of the empire at the moment when the prefent Minifter commenced his Adminiftration.

Exhausted in her finances, and deprived of vigour from the rapid fucceffion of fo many Governments, debility, languor, and decay characterifed every internal department of the State. The public funds feemed to have funk below the point of depression, to which even the misfortunes of the war had reduced them : and the confifcation which had menaced the East India Company while Mr. Fox's bill impended over their property, had operated to fink their flock below any former precedent. The revenue was diminished and invaded by the bold inroads of contraband commerce, which loudly called on the

the Legislature for effectual interpolition and redrefs. No foreign alliance, or connexion with any of the great powers on the Continent, offered the prospect of support in a future war. Holland was completely governed by the Republican faction, who, under Van Berkel in the prefent, as under the De Witts in the last century, had entered into the closest connexions with the Court of Verfailles : while the Prince of Orange, retaining little more than the name of Stadtholder. was reduced to a ftate of paffive infignificance. Denmark, whole fovereigns had been connected by alliances of blood and policy with the Crown of England for near half a century; and whofe natural interefts, in opposition to those of Sweden, tended to confirm these tyes; had departed from her ancient principles, and no longer cultivated the friendship of a kingdom, incapable of extending protection, or rendering itfelf respectable in the Baltic. From the Court of Stockholm, attached for ages to France, no demonstrations of amity 3

amity could be expected. The Emperor, occupied in fystems of reformation, or projects of aggrandizement; planning the exchange of the Netherlands with the Elector Palatine, while he wantonly attacked the Republic of Holland, whofe troops, in defiance of the most facred treaties, he had ejected by force from the barrier towns of Flanders: Joseph, engaged in thefe ambitious enterprizes, and already connected with the Court of Peterfburgh, might be regarded as inimical rather than friendly to Great Britain. Ruffia continued in a state of fullen alienation. and Pruffia betrayed no marks of returning friendship; while France, still conducted by the fplendid and imposing counfels of Vergennes, appeared to extend, to cement, and to confirm her greatnefs.

The first years of the prefent Adminiftration were principally characterifed by those beneficial regulations of commerce, and by those falutary measures of finance, so indispensably requisite in the fallen and impoverished condition of the country. An "East

" East India bill," mild and temperate in its genius, and widely different from the rapacious and arbitrary principles which had rendered the former fo univerfally odious, was introduced, and paffed into a The most vigorous and efficacious law. meafures were adopted for the fuppreffion of fmuggling. The royal woods and forefts, from whence fo great a fupport to the navy ought naturally to be derived, but which had been completely abandoned, as an object of national protection, for half a century, did not escape the vigilant attention of a Minister, anxious to avail himfelf of every public refource. Provision was made for the flow, but certain diminution of the national debt, by the appropriation of a million fterling annually, vefted in the hands of commiffioners for the purchase of flock.

The confolidation of the Cuftoms and Excife, a meafure of incredible labour and detail, as well as of infinite advantage to commerce, by facilitating and fimplifying the intricacies attendant on mercan-I

tile transactions, and the payment of duties; a regulation which in itfelf might immortalize any Administration, was fully and permanently effected. It had failed under the inert and feeble efforts of Lord North; and its completion, fo evidently productive of national benefit, drew applaufes even from the enemies and oppofers of the Minister. This long lift of enlightened and patriotic meafures was clofed by the accomplishment of one of the greatest, but most delicate and arduous attempts, which have diffinguished the prefent century; I mean the " Commercial Treaty with France." An enlarged and liberal policy; the greatest incitements to general industry; the extension of commerce, and the extinction of those mutual jealoufies and antipathies, which have for many ages actuated the rival mofo narchies of France and England : thefe were the characteristics and principles of a treaty, which, notwithstanding the fpacious objections urged against it in Parliament, excited univerfal approbation, and extorted

ed involuntary eulogiums. The genius of Great Britain, long obfcured and fettered, began to affert its antient energy; and, liberated from domeftic anarchy, prepared to re-appear on the theatre of Europe, from whence fhe had been banifhed by internal calamities and diffrefs. The fignature of the " Germanic League," at Berlin, whofe object was the prefervation of the liberties of the Empire against the ambition of Joseph the Second, was the first fymptom exhibited of returning attention to the concerns of the Continent; and though this confederation was only acceded to by his Britannic Majefty in his capacity of Elector of Hanover, yet its effect unquestionably extended beyond its oftenfible object, and recalled the English nation again to general view and confideration.

While under a wife, vigorous, and economical Government, we were thus refuming our ancient eminence and dignity among the European States, the clouds of difcontent and civil commotion were ra-I 2 pidly pidly collecting over the monarchy of France. The finances, involved fince the ceffation of the late war in augmenting embarraffments and inextricable difficulties, might have been found beyond the probity of a Sully, or the capacity of a Colbert, to re-establish : in the hands of Calonne, raifed to the fuperintendance, they appeared to prefent a profpect of public infolvency as imminent and unavoidable. Though the Court of Verfailles was much diminished in majesty and fplendor by the numerous reforms which had fucceffively taken place, yet the ministry had not fubstituted any judicious fystem of frugality, nor adopted any meafures of energy and wifdom, either for the alleviation of the national burthens, and liquidation of the enormous debt contracted under the late and prefent King; nor (which feemed to be still more necessary for their perfonal fafety) to guard against the gathering ftorm of public violence and indignation.

Louis the Sixteenth had already, in a con-

confiderable degree, furvived the respect, though he continued to enjoy the affection of his people. The first years of his reign, conducted by Maurepas and Vergennes, had been diftinguished by the most brilliant fuccess; which, while it dazzled and flattered the national vanity, had, in a great meafure, concealed from view the ruin which it occasioned in the finances. The King poffeffed none of those qualities, either corporal or mental, calculated to fascinate, and to supply the place of more folid endowments. His figure was deftitute of dignity, and his addrefs awkward and embarraffed. He neither knew how to affume the open and winning manners of Henry the Fourth. nor how to adopt the majeftic condefcention of Louis the Fourteenth. Attached to the Queen from motives rather fenfual than intellectual, and restrained by religious fcruples from forming any connexions of gallantry with other women, he never, in any inftance, violated his nuptial fidelity, though furrounded by courtiers anxious to anticipate, and eager to to administer to his defires on the first intimation. Addicted to the pleafures of the table, and fometimes induced to pafs the limits of temperance and fobricty, he yielded in those moments of facility to the demands which the profusion of the Queen, and of his brother the Court d'Artois, made it neceffary for them continually to renew. His own expences were moderate, and his pleafures few. The former were chiefly confined to the construction of the Castle of Compiegne, and the repairs of the palace of Verfailles. The latter confifted principally in the amufement of the chace. Though much neglected in his education during the life of Louis the Fifteenth, his mind was not uninformed; and he had attained fince his acceffion to the throne, a very, confiderable degree of acquaintance with polite letters, hiftory, and geography, by his own private application and folitary ftudy, unaffisted by any aid. In the art of reigning, he had unfortunately made little progrefs or proficiency. Unambitious

tious and moderate in his character, he formed no views of conquest. He even disapproved, though only passively, of the alliance with America, into which his ministers had led him in the commencement of his reign; and suffered himself, with some degree of aversion and reluctance, to be made an accessive to the independence of the Thirteen Colonies.

His parts, however fluggifh, inert, and limited, yet were not inadequate to the comprehension and discharge of the high duties annexed to his station. He unquestionably loved his people, and paffionately defired, at the price of every perfonal renunciation and facrifice, to render his reign dear to France. Averfe to cruelty, and of a nature acceffible to the impressions of pity and humanity, he threw open the gates of the caftle of Vincennes, which for ages had been one of the principal prifons of flate; and mitigated, in numerous inftances, the rigour of arbitrary power, which his grandfather had ftrengthened and abufed. His

His behaviour on the night of the 5th of October, 1789, has evinced, notwithstanding the doubts which have been entertained upon that point, that he did not want personal refolution or fortitude. -But the quality in which he has been eminently deficient, and to the want of which may be principally afcribed all the late calamities of his life, is Political courage and In times of tranquillity and redecifion. pose, this defect might not have been perceived; or, if difcovered, might have yet been limited in its effects : in tempeftuous periods, and popular infurrections, it has convulfed the monarchy, and menaced the existence of the throne itself.

The character of the Queen, though ftrongly contrafted with that of Louis the Sixteenth, was perhaps ftill more calculated to alienate the affections and excite the clamours of the nation. Of a figure favoured by nature, and adorned by gracious and infinuating manners, fine was formed to attach mankind. The fhort period which elapfed, fubfequent to her marriage marriage with the Dauphin, in 1770, and previous to her afcending the throne, was marked by the most general partiality, and by all the flattering prognostics of poetry and genius, who anticipated the future glories and felicity of her reign\*. Her education in the court of Vienna, under the fevere infpection of Maria Therefa, a Princefs

\* It was during this brilliant and transitory portion of her life, that fhe was feen by the author of a production, which has recently made its appearance in this country; and which, from the celebrity of the writer, as well as from the interest excited by the fubject itfelf, has been read with univerfal avidity. It is not my intention to criticife, or to appreciate the merits of a performance, which embraces fo many objects, and ranges over fo vaft a field, as the late Revolution in France opens to a creative imagination. With fome errors and fome blemishes, it appears to me to be a most extraordinary exhibition of genius, fancy, and in many parts, of deep, able, and judicious reafoning. Its author is entitled to fomething more than the mere approbation of every man who refpects kingly power, or established Government; and who deprecates the violence of popular innovation. Perhaps the portrait of the Dauphiness may be too highly coloured; but it is the colouring of Titian, and not of a common artift. Indeed, those who remember the prefent Queen before the death of Louis the Fifteenth, must admit that fhe was then calculated to excite fentiments of perfonal admiration and delight, in no ordinary degree.

eminent for chaftity and piety, feemed in fome measure to guarantee the existence of thefe qualities in her daughter. But, Marie Antoinette appears to have inherited fcarce any of the characteristic virtues or vices of the Auftrian family, except her attachment to the Houfe from whence fhe fprung. The fond predictions of adulation, offered to the Dauphinefs, were not realized by the Queen. Her levity of manners; her expensive prodigality; her diffipations; her attachments; her retirements; perhaps, more than all these defects, her fuppofed abufe of the afcendant which fhe had acquired and preferved over her hufband, gradually eftranged every order of the people; and eventually, as the public embarraffments augmented, rendered her generally odious. Her actions were examined with the most fevere and unjust spirit of national enquiry. Her political connections with the Imperial ambaffador were as loudly arraigned on one hand, as her perfonal intimacy with the Comte d'Artois was strongly cenfured on the

## ( 67 )

the other. Imputations the most injurious to her fame as a woman and a wife, were fuperadded to accufations of her difposition to facrifice the interest, and squander the treasures of the kingdom over which she reigned, in order to aggrandize her brother the Emperor. She was accused of ministering to the weakness, and even stimulating the appetites of the King, with a view to avail herself of his fondness, or temporary privation of reflexion.

The continual vifits, and long interviews which she accorded to Madamoifelle Bertin, excited fentiments of difapprobation in thofe, who thought the leifure of the first Queen in Europe indecently thrown away in difquifitions upon a cap, or confultations upon a handkerchief. Her purchase of the palace of St. Cloud, in the midft of general pecuniary diffrefs, was taxed with equal i.np:udence and profusion. Her frequent recirements to Trianon were ftigmatized, as exhibiting fcenes unfit for the public eye. The mysterious and inexplicable transaction relative to the famous necklace, K 2

lace, afferted to have been purchased by her; although the Cardinal de Rohan and the Comtesse de la Motte were the victims of it, yet had left impreffions difadvantageous to her honour in the minds of a nation, difposed to fee all her actions through an unfavourable medium. Her predilection for, and attachment to the Duchess de Polignac, suffered the most malignant comments of fatyrical prejudice; and the liberal donations, or high employments, with which that family was diftinguished, neceffarily added to the load of public execration. Thefe accumulated topics of popular invective and animadverfion, were circulated with rapidity, and received with equal avidity, by an ignorant and credulous multitude, who filled the arcades of the "Palais Royal," and who imbibed the most inveterate detestation of their Queen, as conceiving her the author of the public diffrefs. They had already, in fome degree, marked her out as a victim to the general indignation; and anxioufly waited for the favourable occafion;

occafion, which fhould liberate the Sovereign and the nation from the pretended evils of her influence, and leave Louis the Sixteenth to the impulse of his natural beneficence and affection for his people.

The Count de Provence, the eldeft of the King's two brothers, acted a very inferior and fubordinate part upon this great theatre. Either destitute of talents to excite public attention, or repressing them from motives of prudence and fituation, he appeared only in the back ground; and formed a contrast to the imposing qualities which diftinguished the Count d'Artois. Of a figure much more graceful and elegant than either of his brothers. this Prince was likewife adorned with more dignified, if not more courteous manners. Attached to the Queen from fimilarity of tafte and character, he even exceeded her in profusion, expence, and diffipation. After having paffed the morning on the " Plaine de Sablons," in the drefs and occupations of a jockey, he only retired from these fatigues, to repose in the palace

arms of Madamoifelle Contat. His little palace of "Bagatelle," in the "Bois de Boulogne," was at once the fcene of the most refined and voluptuous debauch, and of the most profligate pleasures which luxury could devife or affemble. Two fons, already advancing fast towards manhood, and whofe conflitutions feemed to promife a vigorous health, attracted the eyes of the nation, and gave him a manifest fuperiority to the Count de Provence, whofe marriage had not been fruitful. The feeble and debilitated state of the Dauphin, whofe infirmities already appeared to menace a premature end, left only the Duke de Normandie between him and the eventual fucceffion to the Crown. Though not endowed with any eminent talents, yet, as being of a character more decided and affirmative than either the King or the Count de Provence, he came' more forward to public view; and by his adherence to the Queen, influenced very confiderably on affairs of state.

At

At a greater diftance from the throne, but decorated with the title of First Prince of the Blood, was feen the Duke of Orleans. Poffeffed of an immenfe revenue. and having in reversion all the domains of his father-in-law, the Duke de Penthievre, he might be efteemed the richeft fubject in Europe. His reputation for generofity and munificence, bore, however, no proportion to his ample poffeffions: on the contrary, though profuse in the gratification of his appetites, he was accufed by the popular voice of an attention to the arts of æconomy, unworthy of his high birth and fplendid fortune. Emulous of being thought to refemble Henry the Fourth, and the Regent Duke of Orleans, from both of which Princes he derived his descent, he had no fimilarity to either, except in the foibles which shaded the character of the former, and in the vices which difgraced the conduct of the latter, The beneficence, the heroic valour, and clemency of mind, which characterifed the King of Navarre, were not to be traced in

in his degenerate grandfon. The fublime talents, the military genius, and the various endowments of a flatefman and a general, which combined in the Regent, were as vainly fought in the Duke of Orleans.

Abandoned to pleafures of every defcription, he yet had no elevation nor refinement in his amufements. His perfonal courage, which had fuftained fome injury, and excited fome farcaftic comments, from his behaviour under d'Orvilliers in 1778, had not been retrieved by his unpropitious attempt to fignalize himfelf, by accompanying Charles and Robert into the air. The malignant reflexions formerly thrown out upon his intrepidity as a naval officer, were followed by pafquinades upon his fuppofed apprehenfions in the balloon; and he was faid to have been as unfortunate in the park of Meudon, where he alighted from his aerial excursion, as he had been at an earlier period of his life, in the vicinity of the islands of Ushant. Notwithstanding ing these aspersions and defects, he yet possesses which if conducted by judgment, might have redeemed him from the load of obloquy under which he was oppressed. His talents were certainly above mediocrity; his mind enlarged, his manners condescending and popular, and his understanding cultivated by letters, and an extensive acquaintance with mankind.

He was the only Prince of the Houfe of Bourbon who had ever visited England in perfon; the Duke d'Alençon, brother to Henry the Third of France, having been the last, who in the profecution of his defign to marry Elizabeth, had paffed over into thefe kingdoms. The diforders in the finances, and the defperate, or arbitrary meafures to which the Court was neceffitated perpetually to have recourfe, in order to raife new loans and obtain fupplies, had given the Duke of Orleans an occafion, of which he gladly availed himfelf, to regain his long lost popularity. To this public and oftenfible caufe of his alienation from the Court, were added fome T.

fome private mifunderstandings, which had their origin in the interference of the Queen to prevent an alliance, which was projected between the eldeft fon of the Count d'Artois, and the daughter of the Duke of Orleans: a marriage which it was more than poffible might eventually elevate the young Princefs to the Throne of France. Animated and stimulated by thefe motives, he feemed to awake from the diffolute pleafures in which he had been plunged, and to affume the more dignified and ingratiating character of an oppofer of defpotifm, and a protector of the people. This change of conduct foon produced its full effect; and he paffed with the most rapid transition, from the contempt and reprobation of the inhabitants of Paris, to the heighth of favour and general attachment.

Such was the afpect which the Court of Verfailles prefented at the commencement of the year 1787, and fuch were the principal characters and perfonages of which it was composed. The fources of difcontent, and and even of revolt and infurrection, were numerous and augmenting. The ordinary channels of revenue were either dried up, or had become inadequate to the exigencies of the Government. Recourfe was therefore reluctantly had to other modes of obtaining fupplies; and the convocation of the "Notables" was proposed by Calonne to the King, and adopted immediately, as the only remaining expedient.

In these critical circumstances of perplexity and diffrefs, Vergennes, whofe high reputation and fuperior talents had hitherto diffused a lustre over the councils of France, and alone fustained the tottering load of public credit and national grandeur: this celebrated Minister, the fucceffor of Maurepas, and who, fince his death, had during eight years held the first place in the Administration, was removed by death from a fcene, to which all his abilities would probably have been found unequal. Fortunate in his alliances, in his wars, in his negociations, in his acquifi-L 2 tion tion of fame, in the enjoyment of the royal favour and the popular opinion, he was yet more happy in not furviving these frail and uncertain possession. Unlike to Louvois and to Fleury, he neither forfeited the affection of his Sovereign, nor outlived his own talents and capacity. Admired, regretted, and lamented, his death seemed to be the signal which unloosed the jarring elements of civil commotion, and which marked the æra of the extinction of tranquillity and obedience.

The difmiffion of Calonne followed in a few weeks; and the elevation of an ecclefiaftic, the Archbifhop of Touloufe, to the fupreme controul of the finances, whatever expectations it might at first awaken of alleviation and redrefs, only tended in the event to aggravate the national calamities, and to encreafe the popular difcontent. New fystems, equally unproductive as the preceding, and only calculated for temporary relief, afforded neither a remedy to the preffing neceffities of the court, nor to the clamorous grievances ances of the people. The "Notables" were found to be equally incompetent and averfe, to adduce any cure for thefe multipled diffempers of the ftate. They were therefore diffolved; and the nation already began to demand an affembly of the "States General," as the laft and only measure competent to extricate and retrieve them from the danger of impending bankruptcy and ruin.

But the troubles and internal feuds of the Dutch commonwealth, which had been long nourifhed and fed by the political liberality of the cabinet of Verfailles; which had grown up under the foftering hand of Vergennes, and which a feries of deep and artful negociations had inflamed and augmented, now approached rapidly to their crifis. Never could they have attained to their maturity at a more inaufpicious moment for France; and never was the triumph of fortune over the machinations of policy more confpicuoufly exemplified.

## William

William the Fifth, Prince of Orange, poffeffed the Stadtholderate of the United Provinces. Allied by name rather than by blood, to the great Houfe of Naffau, fo fertile in heroes and in legiflators, few traces of the fublime qualities which have rendered that family immortal, were to be difcovered in their fucceffor. But. in the Princefs his wife, fprung from the union of the houfes of Brandenburgh and Naffau, the characteristic energy of both was visible. Driven out of the Province of Holland by the indignities and infults with which the republican faction had treated the Prince, whom they had compelled to retire to Nimeguen, fhe had the courage to fet out for the Hague, and, unatiended by any guards, to traverfe a hoftile country, in the hope of adjusting by her prefence, addrefs, and flexibility, the points in difpute between her hufband and the States. In this arduous and delicate attempt fhe was fruftrated, and, even her perfon laid under an arreft, by the brutality of one of the military officers in

in the fervice of the Republic. Obliged to abandon her project, and to return to Nimeguen, fhe invoked the protection and affiftance of the King of Pruffia, to re-inftate the exiled Stadtholder in the hereditary dignities and offices, of which he had been fo unjustly and unconstitutionally deprived. It was not to her uncle that fhe addreffed thefe entreaties. The great Frederick was no more: he had paid the common tribute to mortality, and had expired at Potzdam under the accumulating weight of age and difeafes. But, though he no longer animated in perfon the councils of Berlin, the vigour of his genius furvived : it feemed even to have attained new force in the hands of a Sovereign, whole more active period of life led him to adopt measures of decision, and whofe near relationship to the Princefs of Orange ftimulated him to warmer exertions in her behalf.

The juncture was favourable to the Pruffian interpolition; and England, under the auspices of a Minister prompt to feize

feize the occasion of again re-appearing with dignity and effect on the Continent, avowedly joined and aided the attack upon the enemies of the houfe of Orange. An army of about fifteen thousand men, commanded by the first military genius in Europe, the Duke of Brunfwick, entered the territories of the States General, in September, 1787, and over-ran with the fame rapidity that Louis the Fourteenth had done in last century, the province of Holland. Amsterdam itself, the centre of difaffection, and the laft afylum of the French and republican factions, after a fhort and ineffectual ftruggle, capitulated, and received the conqueror. A complete, but almost bloodlefs revolution was effected; and the Hague, fo long a prey to difcord and to animofity, faw the Stadtholder return, and occupy his high ftation, with every expression of loyalty and attachment.

France, embarraffed, and incapable from her domeftic misfortunes, of interfering either with honour to herfelf, or efficacy to her

her friends, though the appeared to make a feeble effort in their favour, yet ultimately gave way to the ftorm, and confented to difarm; nay more, publicly to deny her having ever intended to fuftain that party, in whofe fupport fhe had expended her treafures, and for whom, in more aufpicious æras, fhe would have involved Europe in blood and hoftility. The high reputation which fo fignal a fuccefs reflected on the councils of Great Britain, was contrasted and rendered more fplendid, by a comparison with the fallen state of her ancient rival, who, only a few years preceding thefe events, in conjunction with America, had feemed to give laws in every quarter of the globe. The energy and wife precaution of the Minister did not, however, remit its vigilance, or content itfelf with having liberated the Dutch Republic, and reinstated the Stadtholder. Attentive to profit of this fortunate and propitious moment, and to avail himfelf of the gratitude with which the affistance extended to Holland had equally M impreffed

impreffed the Government and the people, he cemented those fentiments by immediately framing, and eventually concluding a defensive treaty with the United Provinces. It was figned in April, 1788, and was evidently built on the model of that, which had been terminated under the auspices of Vergennes, between France and Holland, towards the close of the year 1785. Reciprocal fuccours, naval and military, were stipulated; and the bands of political union were drawn as close, as human wisdom and mutual interest could devise.

This alliance, fo much approved, and fo highly beneficial to England, was fucceeded by a fecond, fimilar in its tenor, nature, and tendency, between the Courts of St. James's and Berlin, which was ratified in the month of August of the fame year. They had been preceded by a fubfidiary treaty between England and the Landgrave of Hesse, which enabled the former power, on the payment of a certain annual fum, to demand from the latter, latter, at a very fhort notice, a body of twelve thousand troops.

Thus, in the space of only four years which might be faid to have elapfed fince the complete triumph of the Sovereign and the nation over the " Coalition," had Great Britain, under the conduct of a Minifter who had not yet attained his thirtieth year, rifen from a state of unexampled depreffion, to her antient fuperiority among the European kingdoms. The financ :s had been re-established by a system of unremitting and fevere æconomy. Commerce, aided and emancipated by the wife regulations of an enlarged policy, opened new fources, and navigated feas hitherto unknown or unexplored, in the profecution of its objects. Public credit attained a point of elevation and permanence, unparelleled fince the commencement of the unfortunate war with America. The councils of England, conducted on principles, not of a crooked duplicity, but of rectitude and magnanimity, excited refpect and approbation in the furrounding ftates,  $M_2$ 

states, while they diffused prosperity and felicity over every part of the island.

Political alliances and connections on the Continent, added the prospect of stability to every measure which was calculated for internal fecurity or commercial advantage. The calamities of LordNorth'sAdministration, and the anarchy which fucceeded that unfortunate period : the defalcation of thirteen provinces, and of both the Floridas from the empire : the difgraces of Saratoga, and of the Chefapeake : the tumults, and conflagration of London: in a word, the varied and accumulated misfortunes, which for a long feries of years oppreffed, and had almost overwhelmed the commonwealth, were already erafed from the recollection. A mild and happy calm had fmoothed thefe troubled waves. The Sovereign was defervedly dear to every rank and order of his fubjects, who united in regarding him as their father and bene-The Government, beloved at factor. home, was respected abroad; and the people, happy beyond the example of former

former times, looked up with equal affection and veneration towards the fource of thefe multiplied benefits.

But in the midft of this flattering afpect of affairs, an unexpected and difaftrous change was preparing to manifest itself, which no human prudence could have foreseen, or precautions delayed. We were deftined to experience in its fulleft extent, the mutability of fortune, and the fragility of greatnefs; to hold out a memorable leffon to our own, and to future times, that the fplendor and felicity of man, however folid the foundations on which they may feem to repofe, are in the hands of a fuperior Being, who confers, or withdraws them in an instant. 1 am arrived at that awful and affecting period, when the feelings of all those who shall peruse these sheets, will anticipate my own; and which, from a variety of motives, I should wish to cover under a veil of oblivion, if the publicity of the great leading facts, and ftill more, if the inftruction conveyed by the narration itfelf,

as

as one of the most interesting portions of modern annals, did not supercede my perfonal inclinations. It is not, however, either in my plan or my intention, to relate the private hiftory of that extraordinary period; or to drag into daylight facts and anecdotes, which, curious and entertaining as they must appear to posterity, are, in every fense, unfit for the perusal of the prefent age. Sentiments of duty, delicacy, and respect towards a Prince inexpreffibly dear to his people: towards a Queen, who during near thirty years, and in every relation of domestic life, has been blamelefs and exemplary : towards those illustrious perfons, on whom the fceptre of George the Third must, in the ordinary progrefs of events, at fome future, and as we truft, far diftant period, devolve ; even motives of prudence, decorum, and propriety, arreft my pen; and prevent me from fhading a picture, the outline only of which it is either wife or neceffary to hold up to the public eye, placed as we are fo near the object.

The very nature of the fubject is, indeed, fuch

fuch as to add peculiar embarraffments to those general ones, which prefent themfelves in the way of every man who shall venture to relate the transactions of the time in which he lives, and of which he forms himfelf, though an imperceptible, yet a real and efficient part. Nor is it even a fufficient justification or inducement to undertake fuch a tafk, that the mild genius of the century in which we write, or the freedom which enables us to dictate without apprehension, appear to liberate us from every restraint. There are feelings in a generous mind, anterior to all written law, and far fuperior in their operation to those regulations which are imposed by Courts of Judicature, or legiflative bodies. It is to these refrictions that I shall subject my pen, while the great chain of events may yet be prefented to the English people, and the fidelity of historical truth be preferved inviolate. "Ut, non modo cafus, eventulque rerum, qui plerumque fortuiti funt, fed ratio etiam, cauffæque nofcantur." Like the fublime writer whom I have just cited, and who flourished under the golden reign

reign of Trajan, we too, " rara tempo= rum felicitate, ubi sentire quæ velis, et quæ fentias dicere licet," may, unawed by power, affix the featiment of approbation and of cenfure, in conformity to our own conviction. Such is equally my defign and my determination. But it is only for those who can elevate their minds above the little partialities and prejudices of the day, that it belongs to appreciate the performance of this promife; and to decide how far the prefent work may venture to lay claim to any portion of Roman energy and freedom, or how far the inimortal writings of antiquity would be fullied and degraded by a comparifon with this production.

It is not eafy to imagine or to parallel in the hiftory of the prefent century, a period of more perfect ferenity than that which England prefented in the autumn of 1788. The King, accompanied by the Queen, and furrounded by his family, after having tried the effects of a relaxation from public bufinefs, and of the medicinal

3

cinal waters of Cheltenham, had returned to Windfor; not, indeed, in a state of vigorous health, but by no means in any fuch declining state of indisposition, as to excite alarm among his fubjects. The Prince of Wales, as ufual, paffed the fummer at his Marine Pavillion at Brighthelmstone. Mr. Pitt, occupied in the functions of his station, was detained in the vicinity of the capital; while Mr. Fox, whofe faculties of body and mind had been not a little exercifed and exhausted, by a toilfome attendance in Covent Garden during the extreme heats of August, which was thought requifite to fecure the election of Lord John Townfend as member for Westminster; indulged a degree of neceffary repofe, and withdrew for a fhort time from the hurry of political life. He quitted England, and repaired to Switzerland and Italy, as a fcene calculated to amufe and entertain, while it restored and invigorated a conftitution, impaired by conftant exertion. The great leaders of Ministry and Opposition, having laid afide N

,¥

afide their political animofities, were difperfed in peaceful inactivity over every part of the kingdom. From this state of public recreation and felicity, the nation was rudely and fuddenly awoke, by the reports of his Majefty being attacked with an unexpected and dangerous illnefs. The precife nature of it was for feveral days unafcertained and unexplained, even to those whose refidence near the court should have enabled them to obtain early and au-Meanwhile, fame thentic information. augmented the evil, and the death of the Sovereign was believed to have either already taken place, or to be imminent and inevitable.

The grief and diftraction which were manifested in every part of the island, on the publication of this calamitous event, can be only compared with that of the Roman people, on the news of Germanicus being feized with mortal symptoms at Antioch; as the diftresful situation of the Queen bore fome resemblance to that of Agrippina. "Passim

" Paffim filentia et gemitus, nihil compofitum in oftentationem; et quanquam neque infignibus lugentium abstinerent, altius animis mærebant." Time, however, gradually divulged the truth, and changed the apprehensions of the nation for the fituation of the King. His diforder was understood to have fallen upon the brain, and to have produced, as might be expected, a temporary privation of reafon. As the caufe of this alienation of mind was extraneous and violent, it might be hoped that it could only be of fhort duration : but the iffue was uncertain, while the fuspension of all government, and of every function attached to the kingly dignity, was immediate and indifputable. A fpecies of interregnum in fact took place; though unaccompanied by any of those circumstances, which usually characterize and accompany that unfortunate state. The kingdom, anxious, and with eyes directed towards their Sovereign, betrayed no fymptoms of confusion, anarchy, or civil commotion. The First Minister continued to exer- $N_2$ cife.

<sup>.</sup> 

cife, by a general fubmiffion and confent, the powers delegated to him before the King's indifpofition; and the political machine, well conftructed, and properly organized, fuftained no derangement or injury whatfoever from this flock, except those infeparably connected with delay in the tranfactions or negociations pending with foreign courts.

Meanwhile, the Heir to the monarchy had quitted Brighthelmstone on the first information of his father's malady, and repaired to Windfor, whither he was followed by the Duke of York. Physicians were called in, though ineffectually ; and as the nature of the distemper and of its final termination opened a wide field to conjecture, change and alteration, an express was fent to overtake Mr. Fox in whatever part of the Continent he might be found ; and to intreat that he would return without delay to England.

The two Houfes of Parliament, in confequence of the preceding prorogation, met in a few days fubfequent to thefe extraordinary

traordinary events. The general agitation and curiofity, even if they had not been aided by other emotions of hope and fear. of ambition, and of public duty, would alone have produced a numerous attend-Mr. Pitt opened the fubject of ance. their meeting in a very concife and pathetic manner; lamented the occasion, expressed his hope that the caufe would fpeedily be removed, and in purfuance of that idea, advised an immediate adjournment of a fortnight. The proposition was received in deep filence by the oppofite fide of the Houfe, and affented to in mute acquiefcence. Their leader was not yet arrived; and confequently time was wanted to adjust and determine on their plan of action, under circumstances fo delicate and unprecedented. In the interval which took place, his Majesty was removed to the palace of Kew. The Prince of Wales returned to Carlton Houfe; and Mr. Fox. impatiently expected, after a journey which he performed with incredible expedition from Bologna, in a very infirm and and difordered state of health, arrived in London, and assumed his just pre-eminence in the counfels of his party.

Those counfels evinced their nature and object, as foon as the late adjournment was at an end; and Mr. Fox, generoufly, though perhaps injudicioufly ftepping forward in the fenate, rather laid claim to the vacant fceptre in the name and on the behalf of the Heir Apparent, as belonging and devolving to him of right; than preferred his pretenfions with modefly and fubmiffion, at the bar of the affembled na-Perhaps a ftep more injurious to the tion. great perfonage whom it was intended to ferve, or more pregnant with confequences to be deprecated, of every kind, could not have been devifed or executed. Perhaps, too, when time fhall have withdrawn that curtain which is still stretched across these recent and interesting events, we may difcover, that in advancing fo unqualified a demand of the regency, he did not precifely follow the dictates of his own elevated mind, and illuminated judgment. It

It wakened a jealous spirit of enquiry into the fuppofed origin and foundation of that afferted right, in the breafts even of the moft liberal and unprejudiced. It compelled Administration to probe that problematical and obfcure part of the British Constitution. It reminded those, to whom the writings of Shakespear were familiar, of that affecting and pathetic fcene, where Henry the Fourth, under a temporary privation of his faculties, finds on his recovery, that his eldeft fon has carried away the infignia of his royal dignity, which, had he only waited a few hours, would have been his by devolution.

The difcernment of Mr. Pitt faw, and inftantly enabled him to profit of this error in his antagonift. He demanded the difcuffion and decifion of fo great and leading a principle, which led to conclusions unlimited and undefined, as well as fubverfive of the tenure on which a King of England had originally received his crown; previous to any ulterior difposition and diffribution of offices. He was joined by

by the majority of the Houfe in this requisition, and thus commenced his refistance under aufpices and circumstances peculiarly fortunate. It was in-vain that the Prince of Wales, already rendered fenfible of the injury which his caufe had fuftained, equally in Parliament and among the people, by Mr. Fox's unqualified claim of right, endeavoured to wave and prevent all further discussion of fo invidious a subject. It was in vain that the Duke of York, in his brother's name, and by his authority, renounced any fuch affumption of power, and made this public declaration in the Houfe of Lords. Nor was Mr. Fox's attempt to qualify his first affertion, and to give it a more mitigated fenfe, received with better fuccefs in the other Houfe. Parliament, roufed to a fenfe of the neceffity of declaring itfelf folely competent to fill the vacant throne, proceeded to that great act without circumlocution or delay; and having pronounced upon this important preliminary, then decided that the Prince of Wales fhould

3

should be invited and requested to accept the Regency, under certain limitations. The month of December elapfed in these contests, and the year 1789 commenced under the most gloomy prefages. Mutual asperity and reproach embittered every debate. No appearances of convalefcence or recovery, fo ardently anticipated by the nation, had yet manifested themselves in the malady of the King. In addition to the keenest fensations of private distress as a mother and a wife, the Queen faw herfelf on the point of being placed in the most painful, though indifpenfably neceffary fituation ; that of being entrusted with the care of the Royal Perfon, and of ftanding in a fort of rivality and competition to her eldeft fon. The Prince, who afpired to'a Regency, unfettered by any reftrictions, betrayed in his reply to a letter which the First Minister addressed to him, and in which the great features of that intended delegation of the Royal power were delineated, his warm refentment and diffatiffaction at many of those defalcations. He $\cap$ 

He concluded, however, by reluctantly and coldly confenting to receive it, curtailed and degraded as it might be by Ministerial or Parliamentary distrust.

A fecond examination of the phyficians who had attended his Majefty during the courfe of his diforder, which took place before a Committee of the Houfe of Commons. and which was certainly not conducted on the part of Opposition with either delicacy or judgment, tended to throw very little light on the great object of public enquiry; the probable duration and period of this afflicting malady. Mr. Pitt conftantly and warmly maintained the probability of its happy termination; and regarding it as neither distant nor hopelefs, made the refumption of the Royal power by the Sovereign with facility and celerity, as foon as he should. be enabled to wield the fceptre, the first and leading principle of all his meafures and propofitions. The adherents of the Prince of Wales faw the profpect of his father's recovery through a very different medium, and conceived of it not only as improbable,

ble, but as hourly augmenting in that improbability. They were fuftained in this opinion by Warren, as the Minister was confirmed in his opposite fentiment by Willis; two phyficians, on whofe contradictory prognoftics and apprehenfions each party implicitly relied. The former, at the fummit of his profession, and unquestionably possessed of great medical skill, was yet accused by the public voice of leaning in his inclination towards the party of the Prince. The latter, brought from a diftant province to attend the Sovereign under his fevere diforder, and having been peculiarly converfant in that fpecies of difeafe, boldly and early afferted that he entertained fcarcely any doubts of the King's perfect re-eftablishment at no remote period. The event fully justified his prediction.

Meanwhile the introduction of the propofitions upon which the Regency Bill was meant to be founded, and the reftrictions intended to be imposed upon the power of the future Regent, which were O 2 brought brought forward by the First Minister in the Houfe of Commons, carried the rage and virulence of party to its utmost height. The negation of the power of creating Peers: the nomination of a council to affift the Queen : and the complete refervation of the Royal household, were all arraigned and condemned in the warmest terms by Mr. Fox, as dictated only by ambition, and not originating in state neceffity, or even in regard to the fituation of the Monarch. The hiftory of France under the unhappy reign of Charles the Sixth, was cited, as bearing a manifeft refemblance to the prefent difastrous period; and a Queen, equally venerated and beloved by the nation, was compared to the unnatural Ifabella of Bayaria: as her fon the Dauphin's abandoned and perfecuted flate was afferted to be fimilar to that of the Prince of Wales. Unmoved by these invectives, and fustained by confcious rectitude of intention, the Minister fteadily purfued his way: nor was he, in this critical and diffreffing moment, deferted

.

deferted by either Houfe of Parliament. The Chancellor, who, at the commencement of the King's illnefs, had been fuppofed to have liftened to propofals for forming a part of a new Administration; anxious to evince the falfehood of fo unjust an afperfion, and to give the most unequivocal proofs of loyalty and of adherence to his Sovereign under the present circumstances, collected all the energy of his mind in the various appeals, which he fuccessfully made to the honour and patriotism of the House of Lords.

In this stage of the public bufinefs, at a moment when the King's fituation appeared most to exclude hope, and while the House of Commons were fully occupied in framing the principal component parts of the act which was to establish the Regency, Mr. Fox withdrew from the scene, and quitting London, retired to Bath. His difordered state of health was affigned as a pretext for this secession at so extraordinary and critical a juncture; but the public conceived the motives of it to originate in very different

different causes. Diffention and jealousy had already pervaded the counfels of Carlton House. The distribution of offices under the approaching Regency had produced alienation among the chiefs. An interior Cabinet, different in its views, and opposite in its objects to the great oftenfible leaders of the party attached to the Prince of Wales, had fet up a separate standard, and formed a distinct interest. Difference of opinion had manifested itself upon fome very delicate, and perfonal points. Cabal and intrigue had penetrated into the clofet. His Royal Highness was generally fuppofed to have experienced difficulties, if not peremptory refufals of gratifying his wifhes, on the part of the Duke of Portland; and that, in relation to perfons and things peculiarly near his heart. These numerous fources of difunion were still however, in some meafure concealed from view, by their very nature, and the mutual interest or honour of the parties themfelves. The great acts of parliamentary legiflation proceeded, and

and were nearly approaching to their termination. A very fhort period, probably not exceeding three days, must have completed the bill, which was to declare the incapacity of the Sovereign to conduct the national affairs, and to transfer the fceptre, though with diminished influence, to his fon. The members of Administration were on the point of refigning their charges, and the new Ministry, already fettled, prepared to enter on office : while the English people, fondly attached by every fense of loyalty and affection to their Monarch, as well as from gratitude and efteem to the First Minister, in dejection and filence looked on, and faw the Government transferred to others, who, whatever abilities they might collectively poffefs, certainly neither merited nor enjoyed the general approbation and confidence.

But the term of interregnum and miffortune was now arrived; and the impending calamity which had menaced England with all the evils of a Regency, far

far more to be deprecated and dreaded than those from which the country had escaped in 1784, was fuddenly and unexpectedly diffipated. The diforder, under which the King had fuffered during three months, and whofe violence had hitherto appeared to baffle all medical skill and exertion. gradually, but rapidly fubfided. Sanity of mind and reafon refumed their feat, and left no trace of their temporary fubverfion. Time confirmed the cure, and restored to his subjects a Prince, rendered fupremely and peculiarly dear to them by the recent profpect and apprehenfion of his lofs. The vision of a Regency faded and difappeared, as the Sovereign came forward to public view, and was totally extinguished by his refumption of all the regal functions. The demonstrations of national joy far exceeded any recorded in the English annals, and were probably more real and unfeigned than ever were offered on fimilar occasions. It was not only that a King, beloved and refpected, was recovered from the most afflicting of all

all fituations incident to humanity, and enabled to re-afcend the throne. Sentiments of difapprobation and of general condemnation, affixed to the measures and conduct of the opposite party, heightened the emotions of pleafure, by a comparison with that flate from which the kingdom had been fo fortunately delivered. No efforts of despotism, or mandates of absolute power could have produced the illuminations, which the capital exhibited in teftimony of its loyalty; and these proofs of attachment were renewed, and even augmented, on the occasion of his Majefty's first appearance in public, and his folemn proceffion to St. Paul's, to return thanks to Heaven for his recovery. Serenity and tranquillity, fo long banished, refumed their place, and foon effaced the recollection of a calamity, not more awful and alarming in its appearance and progrefs, than fpeedily and happily extinguished.

The attention of Europe, which had been fo powerfully attracted towards England during the continuance of the fevere indifpo-

P

fition

fition of George the Third, was now to be directed to another object fcarcely lefs productive of change, and big with the most important confequences. France, folong inured to fervitude, and only tracing the existence of her liberties in the page of forgotten hiftorians, or antiquaries : whofe fetters, originally imposed by Richlieu, and strengthened by Mazarin, had been rivetted by the lapfe of near two centuries; by the proud tyranny of Louis the Fourteenth, and by the profligate defpotifin of his fucceffor : France, ftimulated by the writings of genius and philofophy, which in defiance of arbitrary power, have illuminated and dignified the prefent age, afpired to freedom. The weaknefs of the Sovereign; the incapacity or timidity of his Ministers; the exhausted state of the treasury and finances; the unexampled and pertinacious opposition of the Parliament of Paris to register, or fanction the Royal edicts for the imposition of new taxes; the failure of the harvefts, and confequent augmentation in the price of bread; all thefe these concurring circumstances contributed to produce and accelerate a revolution.

The various Parliaments of the kingdom, in terms of energy and firmnefs to which they had been long difufed, clamoroufly demanded the immediate convocation of the "States General," as the only conftitutional, or adequate remedy to the diftempers of the state. They adhered to this requisition, not only in defiance of the difpleafure of the Crown, which was manifested by the banishment of the Parliament of Paris to Troyes in Champagne; but in opposition to their own effential interests, and even eventual existence. The nobility, attached by fo many ties to the Sovereign, and the natural fupporters of his prerogative; irritated at the attempt made by Calonne, and perfifted in by the Archbishop of Toulouse, to deprive them of their exemption from the projected land tax, or " impot territorial," joined the courts of judicature in their refufal to register the meafures proposed, and forsook their hereditary maxims of policy, to adopt P 2 the

the popular party. The irrefolute conduct of the First Minister under these delicate and trying circumstances, invigorated and emboldened the enemies of Government; and the spirit of remonstrance, complaint, and menace, dessemblated with industry, became daily more general and alarming.

The Archbishop, after many inefficient or unfuccefsful plans for the re-eftablishment of the finances, and fome ill-conceived exertions of feverity and power against his opponents, felt himself unequal to combat the gathering florm of national indignation; and retiring from a fituation of danger and eminence, abandoned his mafter to the mercy of events. He even quitted France, and paffed the Alps into Italy; as Calonne, under fimilar expressions of general refentment, had done in the preceding year; when finding the Royal protection withdrawn, and already impeached by the Parliament of Paris. he retreated first into Holland, and from thence croffed the fea to England. In this perplexed fituation, Louis the Sixteenth

teenth, compelled to difmifs one Minister. and forfaken by another; furrounded with embarraffments, and having only a choice of evils; confcious that the very foundations of the throne and monarchy were crumbling under his feet; endowed with no talents or great qualities which might enable him to fustain his own dignity, coerce his fubjects, or reftore order and energy in the public affairs : alarmed and terrified at the demonfrations of difcontent which appeared in the capital, and the provinces: under the preffure of thefe various confiderations and apprehenfions, he embraced the refolution of meeting the wifhes of the nation; and if driven to the laft neceffity, of laying the diffreffes of the Crown before the representatives of the people.

Neckar, who had conducted the finances during the profecution of the late war with England, and who had attained a very unmerited degree of popularity fince his difmiffion from office, was reinftated in his employment of Comptroller General. The avowed enemy of Calonne, whom he

he accufed of peculation and malverfation, he had appealed to the public by various controverfial writings, defamatory of that Minister, and tending to criminate him as a defaulter in the eyes of France and of all Europe. The famous " Compte rendu au Roi" in 1781, in which he laid open to his own Sovereign, and to all mankind, the expenditure, revenue, and refources of his country, may be regarded not only as an unprecedented difclofure of the hitherto facred and unrevealed arcana of the French monarchy; but as having operated much beyond the immediate and oftenfible pretext of his own justification, by awakening, and directing the reflexions of every class of men towards the profuse distribution of the public treasure. Simple in his exterior, and decent in his manners, Neckar attained the fame of difinterestedness and probity. Equally republican in birth and in principles, he flattered by thefe circumstances, the prevailing fpirit and genius of the times. Avowedly odious to the party of the Queen, and of

1.74 4.54

of the Count d'Artois, he could hardly be fuppofed to poffefs the real confidence or attachment of the King, who had only been driven by his own diffrefs, and the current of popular favor, to have recourfe to his affiftance and fervices. Deficient in all the effential qualities of a great Minister, and ignorant of those enlarged principles of taxation and revenue, which were alone competent to the extrication of fo vaft a monarchy as France, he fupplied thefe defects by little arts and narrow projects, adapted to the exigencies of the day. In the Canton of Bern his talents might have entitled him to refpect, and they would have been in their proper fphere. An able arithmetician, but a feeble statesman, he only appeared in the first station of finance, to evince how inadequate were his abilities to that dangerous elevation; and after vainly attempting to fuffain an ill-founded reputation, he has now retired to oblivion, unlamented, and almost unnoticed by that nation, among whom he was fo lately idolized.

Although

( 112 )

Although the recall and nomination of Neckar appeared to give general fatisfaction, and awakened the hopes of his numerous and fanguine admirers, yet thefe fymptoms of approbation gradually fubfided. The temporary effect of his name in raifing the public credit, produced no permanent or beneficial confequence. Languor and debility characterized every operation of finance; and Government became lefs competent to refift the encroachments of the people, in proportion as its embarraffment multiplied. Paris, rendered clamorous by the high price of grain, and attributing this fcarcity more to the arts of monopoly, and even to the indirect interference of the Court in permitting the exportation of corn, than to any deficiency in the productions of the earth, proceeded to acts of violence, bordering on infurrection. The introduction of a body of military forces into the capital, quelled, not without a confiderable effusion of blood, these first symptoms of revolt, and reftored a degree of tranquillity and 3

and fubmiffion. Notwithflanding this apparent check to the fpirit of popular innovation, every circumstance tended to evince, that the numerous fubjects of complaint on the fide of the People could not be extinguished, by any expedient short of unconditional fubmiffion on the part of the Crown; or of an appeal to the fword, if the former meafure should be thought too degrading for a Prince born in the purple, and accuftomed to regard his power as unlimited and irrefiftible. The naked and unprotected Majesty of the throne, no longer environed, as under Louis the Fourteenth, by a fplendid household and the pomp of royalty, formed a very inefficient barrier against a nation, enthusiastic in their demands of a conflitution ; and who feemed to be determined to feize the favourable moment, for curtailing the odious prerogative of iffuing " Lettres de Cachet," and raifing fupplies by arbitrary mandate. The levities and profusion of the Queen; the haughty tone which was affumed by the Count d'Artois on feveral occasions; and the

the fuppofed fubfervience of the King to his wife and brother, encreafed the frenzy for reformation, and added to the general effervefcence. Yielding with ungracious reluctance to thefe manifeftations of the approaching florm, the King confented to adopt the humiliating and unwelcome advice offered by his Minifter, of convoking the States General at Verfailles: but, at the fame time, flimulated to refiftance by his own feelings, as well as by the exhortations of thofe who were continually near his perfon, he began to prepare for extremities, and to affemble forces.

The Duke of Orleans, who, at an early period of the prefent troubles, had been ordered to retire to his feat at Reinfy, on account of the active part which he had taken in opposition to the Government, had obtained, from the lenity or indulgence of the Court, permission to revisit Paris. Lefs fensible to this mark of favour, than irritated by the act of feverity which preceded it, he determined on revenge, and embraced with ardor the popular caufe. His high quality and near alliance to the

the Sovereign; his immense revenues; his central fituation at the "Palais Royal," in the heart of the metropolis; his numerous connexions, and extensive influence: this combination of circumstances enabled him to become a very dangerous and formidable opponent to the Crown, in its prefent fallen and debilitated state. He probably did not apprehend the extremities to which his own intrigues might conduct a tumultuous affembly; or he might conceive that he fhould always be able to direct its operations, and to fuperintend its movements. It is even possible, as his enemies affert, that the flattering profpect of the Regency, which already opened itfelf to his ambition as neither a remote nor improbable event, conduced to determine his line of action, and to prevent him from feeing the precipices with which fuch a purfuit was furrounded. He was elected a member of the States General for Crepy in Valois, and took his feat in the Affembly.

This extraordinary convocation of all the orders of the kingdom, which had Q 2 not not been fummoned fince the Regency of Mary of Medicis, and whole very exiftence feemed to have been annihilated by three long reigns of arbitrary power, was opened with the utmost folemnity by Louis the Sixteenth, affifted by the Princes of the Blood, and accompanied with all the external fplendor becoming fo august a ceremony. Many fources of internal difcord and confusion, almost inevitable from the competition and opposite pretensions or interest of the Nobility, Clergy, and Third Eftate; the facility of introducing corruption among fo vaft and mixed a body of men; above all, the loyalty and adherence naturally to be expected from the two first claffes of the ftates : thefe inherent vices in their formation infpired the Court with a confidence, that no unanimity or exertion of vigour would ever characterize fo heterogeneous a mass. The first proceedings of the Affembly justified these expectations. Much time elapfed in difputes arifing from the incompatibility of the respective demands of the different orders; and though thefe

thefe were at last happily terminated by the Nobility and Clergy renouncing, or acquiefcing in the claims of the delegates of the people; yet the Sovereign still posses great refources, and various means of protracting or averting any act militating vitally against his prerogatives.

Had Louis the Sixteenth been left to the impulse and direction of his own character, it is probable that he would have continued to yield to the encroachments of the democratical fpirit, which had already produced fo many involuntary conceffions on the part of the Crown; and which, encreafing in vigour as it proceeded, avowedly aimed at giving birth to a free constitution, and a limited monarchy. He wanted all that energy, elevation, and courage requifite to fustain him in a struggle against his people, and to enable him to reprefs their attempts at emancipation. But in the Queen and the Count d'Artois, resentment at the inroads of a nation whom they had long regarded only as formed for fervitude; and the habitual exercise of arbitrary power, 2 warmly warmly impelled to every exertion for its prefervation; while it dictated the most decided measures for repressing and chaftizing a mutinous and discontented capital.

They united their efforts to fustain the irrefolution of the King, and fucceeded. It was determined in the cabinet of Verfailles, to adopt the most vigorous principles; to diffolve the National Affembly; to difmifs the Comptroller-General; and to punish the infolence of the metropolis. Prudence and addrefs were, however, requifite to mature these counfels, and to facilitate their execution. A great body of forces, principally confifting of the Swifs and German regiments in the fervice of France, was gradually collected from different provinces. The Marechal de Broglio, an officer of high military reputation, and of known attachment to the Crown, was named to the fupreme command. Every neceffary preparation for maintaining the Royal authority, if neceffary, by the most spirited and fevere acts of punishment, was made, without even the

affectation of difguife or concealment. The capital, incapable of refiftance, and unconfcious even of its own capacities of defence; defitiute of leaders, of arms, and of troops, waited patiently the chaftizement which impended.

Paris, involved in circumstances more diftressful even than those in which it ftood, when invefted by Henry the Third in 1589, and under an equal necessity of fubmitting to the conditions which an incenfed monarch might have dictated, was fnatched from pillage by a revolution not lefs fudden and unexpected, than that which, two centuries preceding, had deprived Henry the Third of his life. The frantic and fanguinary zeal of a Monk affected this deliverance in one inftance : in the other, the Parifians were indebted to the timidity, delays, and want of decifion in the Court. During the first days of July, the metropolis, though turbulent and riotous, made no exertions to oppose the army by which it was encircled and furrounded. The partizans and fupporters of the Royal power were numerous, and ready

ready to evince their zeal and loyalty. The " Prevot des Marchands," who is the first municipal magistrate, was in the interests of the Crown. The Baffile awed one part of the capital, as the "Hotel des Invalides" did the other. Paris, taken in the toils of arbitrary power, might have been difarmed, and deprived of the means to excite future commotion. The imprudence, pufillanimity, and impatience of the Court rendered thefe advantages of no avail, and precipitated the unfortunate Prince upon meafures which terminated in irremediable difgrace and ruin.

Miftaking, or neglecting the moft obvious principles of policy and wife precaution, which dictated to commence the plan of operations by fubjecting Paris, from whence alone any danger was to be apprehended; the King was induced to difmifs Neckar with expressions of indignation, which were accompanied by menaces and infult on the part of his brother, the Count d'Artois. This step, which evinced a total change of resolutions, and which, from from the popularity of the Minifter, was likely to produce a violent fermentation in every order of men, was followed by others equally injudicious. The States General were driven into the "Salle des Etats" where they held their meetings, by detachments of the Guards; who furrounded them, and who waited only the orders of the Court, to proceed to greater extremities against the obnoxious reprefentatives of the nation.

Had thefe manifestations of vigour been only fustained by inftantly attacking and entering Paris, it is not to be doubted that, unprepared as it still was, and unwilling to expose to the licence of an incensed foldiery the lives and properties of its citizens, the capital would have been without difficulty reduced to obedience. But, an ill-timed and fatal delay, equally injurious with the preceding precipitation, gave the inhabitants time to recover from their first emotions of furprize and apprehenfion. They faw the timidity and imbecility of the Government, who having founded the R charge,

charge, dared not advance to the attack. They profited by this want of exertion; and paffing from one extreme rapidly to another, they almost unanimously took up arms against their rulers and oppress. Joined by the French Guards, who, from a long refidence in the capital, had been peculiarly exposed to feduction, and who at this decifive moment abandoned their Sovereign, the Parifians broke through every obftacle by which they had hitherto been reftrained. The fupplies of arms and ammunition which had been provided for their fubjugation, were turned against the Crown; and the "Hotel des Invalides," the great repository of military stores, after a faint refistance, furrendered.

The Prince de Lambesc, who alone, of all the officers commanding the Royal troops in the vicinity of Paris, attempted to carry into execution the plan for difarming the capital, was repulsed in a premature and injudicious attack, which he made at the head of his dragoons, near the entrance of the garden of the Tuilleries. Already the "Prevot " Prevot des Marchands," Monfieur de Fleffelles, convicted of entertaining a correfpondence with the Court, and detected in fending private intelligence to Monfieur de Launay, Governor of the Baftile, had been feized by the people, and fallen the first victim to the general indignation. His head, borne on a lance, exhibited an alarming example of the danger to which adherence to the Sovereign must expose, in a time of anarchy and infurrection.

The Baftile alone remained ; and while it continued in the power of the Crown, Paris could not be regarded as free, or even as fecure from the feverest chastifement. It was inftantly invefted by a mixed multitude, composed of citizens and foldiers who had joined the popular banner. De Launay, who commanded in the caftle, by an act of perfidy unjustifiable under any circumstances, and which rendered his fate lefs regretted, rather accelerated, than delayed the capture of this important fortrefs. He difplayed a flag of truce, and demanded a parley; but abufing the con-R 2 fidence dence which these fignals inspired, he difcharged a heavy fire from the cannon and mulquetry of the place upon the befiegers, and made a confiderable carnage. Far from intimidating, he only augmented, by fo treacherous a breach of faith, the rage of an incenfed populace. They renewed their exertions with a valour raifed to frenzy, and were crowned with fuccefs. The Bastile, that awful engine of defpotifm, whofe name alone diffufed terror, and which for many ages had been facred to filence and defpair, was entered by the victorious affailants. De Launay, feized and dragged to the "Place de Greve," was inftantly difpatched, and his head carried in triumph through the ftreets of Paris.

Few captives, either of inferior or of eminent rank, were found in the apartments of the Baftile. The Count de Lorges, at a very advanced period of life, difcovered in one of the dungeons of the "Tour de la Bertaudiere," was liberated, and exhibited to the public curiofity in the "Palais Royal." His fqualid appearance, his his beard which defcended to his waift. and above all, his imbecility, refulting probably from the effect of an imprifonment of thirty-two years, were objects highly calculated to operate upon the fenfes and paffions of every beholder. It is indeed impoffible, however we may lament or condemn the ferocious fpirit which has characterized and difgraced the French revolution, not to participate in the exultation, which a capital and a country fo highly illuminated, and fo long oppreffed, must have experienced, at the extinction of this deteftable and juftly dreaded prifon of state. Nor does the rapidity with which it was captured excite lefs admiration, when its powers of refistance are confidered, and the fpeedy relief which might have been afforded to it by the numerous bodies of regular forces, with which Paris was furrounded on every fide.

With the Bastile, expired the royal authority and confideration. The defpotis fin of the French Princes, which long prefcription, prefeription, fubmiffion, and military ftrength feemed to render equally facred and unaffailable: which neither the calamities of the clofe of Louis the Fourteenth's reign, the profligacy and enormities of the fucceeding Regency, nor the ftate of degradation into which the monarchy funk under Louis the Fifteenth, had ever fhaken : that power, which appeared to derive its fupport almost as much from the loyalty and veneration, as from the dread and terrors of the fubject, fell proftrate in the dust, and never betrayed any fymptom of returning life.

Paris, liberated from all reftraint, or even wholefome police, appeared to riot in the intoxication of freedom; and ftained its acquifition by fcenes of violence and blood, unworthy the first capital in Europe. Every trace of obedience difappeared; and even the promoters of the late infurrection were not fecure from the capricious fury of a frantic and favage populace, who filled the "Place de Greve" with clamours, and frequently tore the victim whom ( 127 )

whom their indignation had felected, from the hands of justice.

But, at Verfailles, confternation and alarm filled the court on the arrival of this extraordinary intelligence. Yielding at once to the united impulse of his terrors and his natural inclinations, the King, without even preferving the forms of Majefty however fallen, repaired to the National Affembly, rather as a fuppliant than a monarch. Difordered in his drefs, and unaccompanied by his guards or ufual attendants, he betrayed his agitation in the fpeech which he addreffed to the States. Only two days preceding this melancholy exhibition of degraded dignity, he had replied to a remonstrance which they prefented to him, in terms of determination mixed with menace. He now adopted the language of diftrefs, invoked their affistance, difowned his intention to employ force for the fubjection of the capital, affured them that he had already fent orders to withdraw the troops which had invefted Paris and Verfailles; and profeffed

2

feffed his defire to give the moft unequivocal proofs of his deference to the wifhes of his fubjects. He concluded by imploring them to make known thefe his paternal difpofitions, to the inhabitants of the diftracted metropolis.

The Affembly, which trembled a few hours before for its own fafety, and had expected to be offered up as victims to the vengeance of an irritated Sovereign, replied with expressions of loyalty and affection to these gracious declarations, although evidently extorted by fear. It was however far otherwife at Paris. where the populace, deeming their triumph incomplete while the King remained apparently tranquil in his palace; not only exacted his perfonal and immediate prefence among them, to fanction their outrages on his authority; but accompanied this demand with menaces, if refused, of fetting fire to Verfailles, and at once extinguishing the obnoxious Princes of the Houfe of Bourbon in the flames. Perhaps a monarch endowed with qualities

ties fuch as Louis the Fourteenth possesfied, would perhaps have refused compliance with this humiliating requisition; and while his army was yet entire, and the royal dignity not totally degraded, have embraced the generous refolution of meeting the ftorm, of trying the fortune of war, and at leaft devolving to his fucceffor the prerogatives, which at his acceffion he had received and exercifed. But Louis the Sixteenth poffeffed no abilities competent to fo magnanimous and unequal a ftruggle. He had already abandoned his attempts to maintain the Royal power in its original vigour; and he had now fcarcely any option between the loss of his throne, and a complete fubmiffion to the arbitrary pleafure of a populace, thirsting for blood, inflamed by fuccefs, and daily offering up victims to its revenge.

the First may be supposed to have passed, previous to his afcending the fcaffold; but unattended with that ferenity and fortitude, which eminently diftinguished the English Monarch in the last act of life, he fet out for Paris. Confcious however, of the peril attendant on his appearance in the metropolis of his dominions, and doubtful of elcaping from the rage of the multitude to whom he was to be prefented, he prepared for death, as at least, a possible event. He received the facrament, made fome private difpositions of affairs, and gave various orders in confequence. Though defirous to fee and embrace his fon and daughter before his departure, he yet had firmnefs fufficient to refuse himfelf this indulgence, as fearing that it might too deeply affect, and difqualify him for the part which he was to perform. " J'en aurai plus de plaisir," faid he, " fi je reviens." A gentleman who was near his perfon on this occafion, encouraging him, and venturing to answer for

for his fafety, the King replied, " Henry Quatre valoit mieux que moi; et cependant on l'a affaffiné."

Though he quitted Verfailles at an early hour, it was late before he entered Paris, from the immenfe multitudes who affembled to fee him pafs, and who teftified no fentiments of loyalty in their acclamations. When arrived at the "Place de Greve," and conducted to the "Hotel de Ville," the new Mayor, Monfieur Bailli, who had been elected to fupply the late unfortunate first magistrate, infulted the fallen Prince by a mock furrender of the keys of his capital; which he accompanied with a farcaftic and infolent reflexion on the different fituation in which Henry the Fourth stood, when he received a fimilar testimony of its fubmiffion and allegiance. The cries of the people, who infifted that the King fhould shew himself on the balcony, compelled him to give this last proof of his deference to their wifhes; and to add to the condefcenfion, he accepted from the hands of the Mayor, the National cockade, which he

he first carried to his lips, and then placed in his hat. After having been detained and exhibited as a captive to his own fubjects during the greater part of the day, without fustenance or refreshment of any kind, he was at length permitted to return to Verfailles, and to conceal his emotions in the privacy of his own apartments.

While this humiliating fcene was acting before the eyes of all France, which were turned towards fo unufual and attractive a fight, the adherents to the late meafures, terrified at the menaces thrown out against them, and dreading the most fatal confequences of popular fury, profited of the King's abfence and visit to his capital, to effect their own efcape.

The Count d'Artois, regarding himfelf as peculiarly marked out for profeription and impeachment, and apprehenfive that even his proximity of blood to the Sovereign might prove an infufficient protection to his life, fled among the first, carrying with him his fons, the Dukes d'Angouleme

gouleme and de Berri; two youths who were fucceffively prefumptive heirs to the Crown, in cafe of the demife of the Dauphin. In the hurry of a precipitate retreat, it was found extremely difficult to furnish a few hundred louis d'ors to a Prince. for whofe expensive gratifications, only fome days before, the treafures of the monarchy were infufficient. He took the road to Flanders; and was already far advanced towards the frontiers, before his departure was known or fuspected at Paris. When fo diffinguished a perfonage, and one fo nearly allied to the throne, deemed himfelf no longer fafe even in the Royal refidence, it cannot excite wonder that those of a lefs elevated condition, and who were equally obnoxious to an enraged populace, fhould confult their fafety by inftant flight. The principal roads were covered with illustrious fugitives, under every possible difguife and concealment. The Prince of Condé quitted Chantilly, followed by his fon and grandfon, the Dukes of Bourbon and Enghien. The Prince of Conti, the laft last in fuccession of the Blood Royal, after undergoing many extremities of hunger and fatigue, arrived at Luxembourg; to which place likewise the Marechal de Broglio, abandoning his army, repaired without delay.

The Duchefs of Polignac, fo long unrival'd in the affections of the Queen. and round whom all the pleafures of the Court of Verfailles were ufed to affemble : tearing herfelf from this fcene of diffipation, attain'd with difficulty the city of Bale in Switzerland; after having encountered numerous dangers, and been preferved from the last degree of violence as the paffed through Sens, by the happy prefence of mind which diftinguished an Abbé, by whom she was accompanied. At Bale, by one of those fingular accidents which evince the power of fortune, fhe found in the inn at which the alighted, the late Minister, Neckar; who having paffed through Swabia after his difmiffion, on his way to Geneva, here first received from his enemies, the intelintelligence of the revolution. The Baron de Breteuil, purfued by the moft marked deteftation of his countrymen, evaded, as well as the Prince de Lambefc, the fnares prepared to intercept them: the former reaching Bern in fafety, as the latter did Turin. Monfieur de Befenval, lefs fortunate, was feized at Brie Comte Robert; and even the folicitations of Neckar himfelf, who endeavoured to interpofe in his behalf, were infufficient to obtain his enlargement.

In this general confernation, the Queen, abandoned by all her deareft connexions, remained with her two children, friendlefs, and almoft alone, in the palace of Verfailles. No Prince of the Royal Family ventured to abide the ftorm, except the Count de Provence; who during the continuance of all thefe diforders, had enjoyed a diftinguished share, at least of negative approbation; and whose conduct throughout the critical circumstances which preceded the fedition of Paris, had been such as as to conciliate, in fome degree, the popular favour.

The Duke of Orleans, to whole intrigues, or opposition to the Crown, may be greatly afcribed the rapid progrefs of the general difcontent, and the exceffes of the people; viewed from the ". Palais Royal" with fecret pleafure, the effects of his machinations, and enjoyed his triumph over the vanquished court. The military command of the National troops, and of the capital, were conferred by almost unanimous delegation on the Marquis de la Fayette; as the fupreme civil and municipal jurifdiction devolved on Bailli, Mayor of Paris. The union of both these powers, was however frequently found unequal to imposing proper restraints upon the ungoverned: passions and favage violence of a populace, new to freedom, and who stained its acquisition by daily acts of vengeance and cruelty. The heads of Foulon and Berthier, one of whom had occupied a high fituation in the late

late miniftry, and the other had been intendant of Paris, were carried through the ftreets; and the circumftances with which the death of thefe eminent perfons were accompanied, are only to be compared in horror and atrocity with those attendant on the maffacre of St. Bartholomew, or the affaffination of the Marechal d'Ancre under Louis the Thirteenth.

Meanwhile, at the infligation and request of the National Affembly, Neckar was recalled, and invited by letters of the most flattering, and even penitential tenor, from the King himfelf, to refume the fuperintendance of the finances. Нe yielded, though with apparent reluctance, to thefe entreaties; and repaired to Court, loaded with expressions of general attachment and veneration in every place through which he paffed : while the credulous and deluded multitude expected from his prefence, a fpeedy redrefs of all their grievances, the revival of public credit, and a remedy to the fcarcity of grain, which had excited the clamours of the capital and the T

the kingdom. To the admiration and aftonifhment of mankind, in an abfolute monarchy fo ftrongly cemented as that of France appeared to have been, and in which loyalty was antiently efteemed to be characteriftic of every clafs of citizens, no efforts were made to fupport the Royal power. An enthufiaftic paffion for liberty pervaded all the provinces; and the revolution, commenced on the banks of the Seine, fpread with equal rapidity and unanimity, to the foot of the Alps and Pyrenees; to the Rhine and the Mediterranean.

No permanent calm fucceeded to this form of popular indignation. Elated with the poffeffion of freedom, and exercifing in many inftances, a tyranny more oppreffive and fevere than that from which they had juft efcaped, the people meditated new and greater invafions on the dignity, as well as the prerogatives of the Crown. The prefs, freed even from that wholefome and neceffary reftriction, which Governments the most relaxed impose upon the publication of opinions, compensated for the fetters which it

it had fo long worn, by giving birth to every species of licentious production and infolent attack upon perfons of the higheft rank. The Queen was peculiarly the object of thefelibellous invectives; and every accufation private or political, which malignity could invent, to alienate the affections and irritate the paffions of mankind against her, was circulated, and publicly exposed to fale. Although all the pomp and majefty, which in better times had furrounded and concealed the Sovereign, was now entirely withdrawn: though only guarded by the burgeffes of Verfailles, and deftitute of any military protection against infult and outrage, Louis the Sixteenth flood exposed to every enterprize which a mutinous capital might undertake or execute; yet fome veftiges of perfonal liberty he still retained. He was free to enjoy the diversion of the chace; and the National Affembly, convoked at Verfailles, continued to hold its meetings there, under his immediate fuperintendance and infpcction. It was even thought decent and neceffary, on the part of the new tribunes T 2 of

of the people, to march fome regiments, in the month of September, on whofe adherence they conceived that they could fafely rely, to perform the ordinary functions of ftate; at the fame time that they prevented any efcape, if fuch was intended by the King.

But, where fo many inflammable materials were collected, it was not poffible that any confiderable time could elapfe before they burft into a conflagration. After one or two attempts, which the vigilance and activity of La Fayette prevented from being carried into full execution, the populace of Paris, excited by various arts, and incenfed at the Queen for having brought the Dauphin, and prefented him to the officers of the regular troops after a public entertainment, rofe as by univerfal confent, and determined to march to Ver-By what motives, or with what failles. intentions, the conductors of this armed mob were actuated, it is perhaps impoffible at prefent politively to affert. The deepeft and blackeft defigns have, by popular malignity, been attributed to the Duke Duke of Orleans; no lefs than the attainment of the Regency, at whatever price, and by every mode, however treafonable or flagitious. Many of the circumftances which diftinguished that extraordinary scene, unquestionably evince a plan not more artful than nefarious; and which seemed calculated, by operating on the fears of the Sovereign, to induce him to abandon the throne, and seek his fafety in flight; while the Queen, who was more an object of national obloquy and aversion, might be instantly offered up as a victim to the frantic multitude.

It is difficult to do juffice to the horrors of a night, fimilar only to those which are furnished by the annals of Charles the Ninth, and which reminds us of the times of Catherine of Medicis. Posterity will fcarcely credit, that at the conclusion of the eighteenth century, and in a country eminently diffinguished by all the foster virtues of humanity, acts of blood and ferocity more favage than the Janizaries of Constantinople usually exercise against

against their defpots, were performed with impunity. The fingularity and incredibility of the recital will be augmented by recollecting, that many of the most violent among these ruffians, were women; or, at least habited in a female drefs. Armed with every destructive weapon, they affaulted the guards who were stationed at the door of the Queen's apartments, burft into them, murdered those who opposed their progress, and penetrated to the chamber in which fhe flept. The efforts which were made to retard their fury, and the cries of "Sauvez la Reine," which echoed through the palace, gave heran inftant in which to efcape. The first Queen in Europe was faved from a death the most ignominious, by the interval of almost a fingle moment. Undreffed, and nearly naked, fhe gained a private staircafe, which conveyed her to the King, who received her in his arms, where she fell fenfeless with terror. The materials of the bed from which fhe had just rifen, after undergoing the strictest fearch, in hopes of difcovering the unhappy object of their purfuit.

fuit, were fcattered over the room, as fome gratification to their difappointed vengeance.

Louis the Sixteenth himfelf, appearing on the balcony of his apartment, in the language and attitude of fupplication, vainly implored the populace to fpare his guards, whom he faw maffacred at his feet, without the power of extending to them any relief. He as vainly befought the Queen to yield to the necessity of the time, and to retire to Rambouillet, where her perfon would at least be fecure. Exerting a courage fuperior to her fex, and elevated above a fenfe of the danger to which the was to confpicuoully expoted, the firmly perfifted in her refutal to fly; and declared her determination to accompany the King, and at least to expire as fhe had lived, a Queen of France. Yet, confcious of the probability of her falling a facrifice to the popular rage; fhe armed herself with a poniard, as a last resource against the degradation of plebeian violence and brutality.

It is impoffible, how much foever we may condemn

condemn certain parts of her conduct and character, not to admire the heroifm and magnanimity of this deportment, in which we feem to recognize the blood of fo many Emperors from whom fhe defcended. The weaknefs of the woman was notwithstanding, mingled with the fortitude of the Sovereign; and when fhe entered the coach which was to convey herfelf and the captive King from Versailles to Paris, terrified at the cries of a furious multitude who feemed to demand her forfeit life, fhe threw herfelf into the arms of La Fayette, who offered her his hand at the door of the carriage; and whofe protection fhe invoked to preferve her from outrage and death. Placing the Dauphin in her lap, and feated by her hufband, the cavalcade moved flowly towards the capital; while the heads of the murdered "Gardes du Corps," borne on poles, and held ap to her view, prefented a melancholy profpect of her own probable deftiny. They at length reached the palace of the Thuilleries, thus accompanied, and took poffeffion of that

that part of it defined for their reception and refidence: while cannon, mounted at the principal avenues, under pretence of fafety and defence, fecured them from refcue, and rendered efcape impracticable.

Perhaps no day fo ignominious to the Royal dignity had been beheld, fince the elevation of the Capetian Princes to the throne of France. The capture and imprifonment of Louis the Ninth at Damietta, of King John at Poictiers, and of Francis the First at the battle of Pavia, however unfortunate and humiliating, yet were at last foftened by many confiderations. Those Monarchs were all taken in arms, after exerting the most heroic acts of valour against their conquerors, and owed their misfortunes only to the chance of war. Even Henry the Third, when he fled from his capital, purfued by the Guifes, yet retained his perfonal independence. and foon returned to befiege and to chaftife his rebellious fubjects. Louis the Sixteenth, funk below efteem or commiferation, and not having exerted either ability lity or courage in the defence of his invaded prerogatives, only held a precarious life at the mercy of a feditious and infolent populace, who having already imprifoned, might in any moment of refentment, terminate the reign of their fallen and degraded King. The palace in which he was confined, having been in a great meafure neglected for more than a century, during which time Paris had rarely feen any Sovereign refident in the metropolis, was totally unfit for the reception of a Court; and even the apartments which were occupied by the King himfelf, were in fo ruinous or decayed a condition, as not altogether to exclude the inclemency of the weather. To this fituation was a Monarch reduced, who only a few months before, might be regarded as at the fummit of human greatnefs; and the foundations of whofe throne, ftrengthened by long possession and by habits of obedience, seemed to bid defiance to all the ordinary convulfions which overturn empires, and deftroy the firmestfabrics of human power and wifdom. While

While thefe fcenes of outrage and violence were exhibiting in France, it is difficult to imagine a picture of more complete ferenity than England prefented; and this internal repofe was accompanied with every circumstance of external prosperity, and augmenting national confideration. The year which immediately fucceeded the malady of George the Third, may be ranked among the happiest of his reign, whether it be confidered as perfonally affecting himfelf, or as productive of felicity to his people. The recent danger from which he had efcaped, rendered his health and fafety peculiarly precious to his fubjects; as the animated expressions of their attachment and loyalty must have deeply touched the heart of a Prince, infinitely fenfible to these genuine marks of affection. The character of the Sovereign was not more formed to produce, than that of his Administration was to perpetuate the general tranquillity. The conduct of Mr. Pitt during the whole progrefs of the late commotions in France, may be held up as as a model of political honor and rectitude ; perhaps, equally fo of wifdom. Unlike to Richlieu, who fomented the caufes of difcord between Charles the First, and his Parliament : unlike to Vergennes, who ftimulated the Americans to refistance; and after a feries of indirect and infidious arts, violated the most folemn treaties in order to affure their final independence; the English Minister steadily and systematically adhered to the most exact neutrality. The native elevation of his mind, and the magnanimity which has ever characterifed his measures, rendered him incapable of defcending to the little artifices of crooked and vulgar statesmen. The probity of his private life pervaded and marked his public line of action; nor did fo uncommon and dignified a mode of proceeding, under circumstances which might feem to justify and authorize a more relaxed conduct, fail to produce its full effect on the two nations who were peculiarly affected by it, as well as on the other states of Europe. Some approbation, if not admiration, is indeed due

due to a Government, who have been able to unite vigour, energy, and protection, with the most religious adherence to the national faith, and to every principle of found and generous policy.

The period which is comprised between the months of May 1789 and 1790, like the reign of Antoninus Pius, affords few materials for hiftory, drawn from the interior events of the time. England, at peace with all the world, in the bofom of repofe, faw her commerce and manufactures expand, her credit augment, and her name excite refpect among the most distant nations; while many of the great furrounding European kingdoms were either involved in foreign war, or defolated by domeftic troubles. This tranquillity was not however allied to an ignominious and enervate floth; but, on the contrary, was fecured by vigilance, activity, and exertion. In conjunction with Pruffia and Holland, Great Britain indirectly extended her attention and fuccour to Guftavus the Third, finking under an unequal contest with the vast empire of Ruffia.

Ruffia. Shereftrained and arrefted Denmark, even after that power, as an auxiliary of the Court of Petersburgh, had already taken up arms, and committed hostilities against Sweden. She fignified to Leopold, who had recently fucceeded to the thrones of Hungary and Bohemia, her defire that he would recall his troops from the Banks of the Danube; and the fuftained by her negociations the firmness of the Ottoman counsels, while fhe filently, but not lefs decidedly, imposed limits on the ambition of their great enemy Catherine the Second, by prohibiting her fleet from prefuming to quit the Baltic, and to complete the deftruction of the Turks in the Archipelago.

In this exalted fituation, to which perhaps no parallel in our annals can be adduced, fince the termination of the fhort, but fplendid protectorate of Cromwell, a ftorm unexpectedly and fuddenly arofe from a quarter, where it would feem, that no forefight or precautions could have anticipated the danger. Among the new and unexplored paths of commerce, which the fpirit fpirit of a difcerning and adventurous people had attempted to open fince the peace of 1783, were particularly two, which appeared to promife the most beneficial returns. The first was a whale fishery, fimilar to that which had been carried on for ages near the coafts of Greenland; but transferred to the Southern hemifphere, near the extremity of Patagonia, and in the ftormy feas which furround Cape Horn; as well as in the Pacific Ocean. In the courfe of a few years, this branch of trade had augmented rapidly, and was found on trial to afford very important advantages; nor had it received any impediment from the vague pretensions of the Spanish Crown to the fovereignty of the fhores washed by that ocean, which was the fcene of their exertions.

The fecond of the feenter prizes, original in its own nature, able in its conception, bold in its execution, and having no precedent for its guidance, was directed to countries and to objects almost as much unknown to geographical, as to commercial knowledge

ledge or experience. It demanded many qualities rarely and difficultly combined : a confiderable capital; ministerial approbation; faithful and capable conductors; dextrous navigators; and above all, much time and perfeverance to ripen, and ultimately recompense the persons engaging. in fo eccentric and expensive an expedition. This extraordinary union of talents and circumstances was, however, found in men of no fuperior defcription among the mercantile inhabitants of London : and it will remain a striking monument to future ages, of the energy, capacity, and nautical ability, which diftinguish the prefent century and the British nation, above the most enlightened periods of any antient or modern people.

The North Weft coaft of America, the part of the earth to which this embarkation was defined, was not only fo remote, but fo undefined, if I may be allowed the expression, that its very existence remained unknown or doubtful, before the discoveries of the reign of George the Third.

In

2

## ( 1<u>5</u>3 )

At the commencement of the prefent century, it was thought to be almost as much beyond the ordinary bounds of navigation, as the iflands of the Hefperides appeared to the Greeks; and Swift himfelf, only eighty years ago, when he composed the entertaining voyages of Lemuel Gulliver, efteeming it the proper region of fable and romance, felected it for the pofition of his imaginary Brobdignag. The immenfe tract of land, extending northward from California and New Albion to the Frozen Sea, had, indeed, in a more recent period, been partly explored, and faintly traced by Cook; though much remained for future enterprize and industry to accomplifh, before this difcovery could be converted to any purpose of publicutility. He had, however, afcertained the existence of the continent; and he had received from the barbarous natives, with whom he eftablished a species of barter, some valuable fpecimens of furs, in exchange for European commodities of a far inferior nature.

The

The hope of procuring a confiderable number of these rare and costly skins, for the fale of which a very advantageous market prefented itfelf at Canton in China, was the leading inducement to the adventurers, who engaged in the expedition. But, in the purfuit of private emolument, objects of general and national confequence were neceffarily implicated and interwoven. Behind this coaft, to the eaftward, lay the vast continent of America; opening a field to commercial activity and refearch, in which the imagination itfelf was loft. The difcovery of a communication through this unexplored country, and which may ultimately connect it, to a certain degree, with our fettlements in Hudson's Bay, appears from their account, not to be totally vifionary, though it was regarded as fuch by Cook himfelf.

Conceptions and enterprizes more calculated to enlarge the fphere of induftry; to connect the most remote parts of the planet of the earth by the bands of amity and commerce; to extend the limits of of the human mind; and to immortalize, while they enriched the nation which originated them, have perhaps fcarcely ever been imagined or executed. They were not inferior to the most fublime and daring expeditions of antient Greece, and feemed to partake of the spirit of Columbus: though the prefent age, familiarized to naval skill and enterprize, no longer fees with the fame admiration, or confers the fame eulogiums on modern candidates for fame; who are feldom regarded through any other medium than that of utility, or pecuniary advantage.

Animated by thefe views, and having received the most affirmative marks of the protection of Government previous to their departure, five ships were fitted out from London in 1785, and the two fucceeding years. Four of these vessels, after doubling Cape Horn, arrived fasely on the North West coast of America. The fanguine expectations which had been entertained, of effecting a lucrative X 2 exchange

exchange of commodities with the natives, were fully and fpeedily realized. Cargoes of the finest furs were procured, and fold to the Chinefe, even under great commercial difcouragements and pecuniary impofitions, at fo high a price, as amply to reimburfe and enrich the adventurers. Other attempts, of a fimilar nature, were made from Bengal; and two veffels were fucceffively difpatched from the Ganges to the fame coaft, in the year 1786. A factory was eftablished at Nootka Sound, a port fituated in the fiftieth degree of northern latitude, on the shore of America. Possession. of it was folemnly taken in the name of the Sovereign and Crown of England: amicable treaties were concluded with the chiefs of the neighbouring diffricts; and a tract of land was purchased from one of them, on which the new proprietors proceeded to form a fettlement, and to construct ftorehoufes. Every thing bore the appearance of a rifing colony, and each year opened new fources of commerce and advantage.

Although

Although individuals, occupied in exertions of this private nature, could not be expected to extend their views or efforts to objects of public utility, yet fome further information was collaterally and incidentally acquired, refpecting the contine t of America, in the courfe of their voyages. It is even pretended that a floop, named the "Washington," navigated for fome hundred miles along a vast number of islands, scattered in a fea, which interfects that continent in a north-east direction; and though the accounts hitherto received or transmitted. of this extraordinary and interesting fact, are not either fo minute, or fo accurate, as by any means to entitle them to be implicitly received, yet they appear to be not totally deftitute of foundation, or probability. Every profpect, either of national advantage, or of private emolument, which the commerce of these coasts feemed to promise to Great Britain, was, however, deftined to experience a fudden and unexpected fufpenfion.

On the 6th of May, 1789, two Spanish ships of war entered Nootka Sound; the commanding officer of which, after making every profession of amity during feveral days, feized on the English vessels, in the name of his Sovereign, as they fucceffively arrived from various parts of the coast, imprifoned the crews, confifcated or plundered the cargoes, and ultimately carried them as lawful prizes to St. Blas, in Mexico. Violations fo unprovoked, not only of the peace fubfifting between the two Monarchies, but of all the laws eftablished between civilized nations, were accompanied and aggravated by every circumftance of duplicity, infolence, and cruelty; while they were contrasted with the most friendly assistance and attentions, shewn to the captains of two American ships, the "Washington" and the "Columbia," who had been brought by the fame commercial inducements to the port of Nootka. Thefe testimonies of protection and regard were even carried fo far by the Spaniards, as to compel the crew of one of the captured Englifh

English veffels to affist in navigating the "Columbia" to Canton; through which channel, the first regular and authentic account of these acts of hostility, was officially transmitted to the English Administration, though they had been preceded by some vague and indistinct intimations of the fame nature, made by the Spanish embassfador at the Court of London.

The conduct of the First Minister on receiving this intelligence, evinced no lefs the magnanimity than the decision of his character. Without defcending to the tedious and humiliating forms of request with the Court of Spain, which might elude and protract, if not ultimately refuse, according to its ufual policy, any reparation for thefe outrages; he, in the first instance, by a meffage from the King, informed the two Houfes of Parliament of the whole feries of tranfactions. He clearly evinced the nullity and injuffice of any general pretensions on the part of the Spanish Crown, to a territory, discovered, planted, and occupied by the English; but in particular, to the Port of Nootka, fituated

fituated at a diftance from any known fettlement belonging to that nation. He professed his anxious defire to terminate by amicable explanation and treaty, the prefent caufe of difpute. He at the fame time declared his determined intention, not only to exact from the Court of Madrid an adequate fatisfaction and compensation for the injuries recently fustained ; but to compel Spain to renounce decidedly and formally, any indefinite claim which she might have fet up, either to the exclusive navigation of the Pacific ocean, or to the fovereignty of the whole North West coast of America. He called on the loyalty, dignity, and honour of the Houfe of Commons for fupport, in maintaining thefe invaded rights by force of arms, if Spain fhould be infenfible to the language of reafon.

The approbation which fo manly an appeal to the nation excited, was general and animated. The leaders of Opposition joined in that fentiment, and expressed their conviction of the wisdom as well as necessity neceffity of fuftaining by every military and naval exertion, the effect of negotiation. The celerity with which thefe refolutions were followed, in the equipment of a powerful armament, was calculated to augment the high reputation of the Miniftry throughout Europe, while it called into action all the refources of the kingdom. A diffolution of Parliament, unqueftionably judicious under the circumftance of a probably impending war, followed thefe demonstrations of refertment, and demands of reparation.

If we compare the energy and decifion of fo vigorous a line of conduct, with that which was adopted by Sir Robert Walpole or Lord North, in fimilar fituations, the contraft muft be highly flattering to the prefent Administration. The fluggiss and reluctant difinclination of the former, to perceive or to resent the depredations committed by the Spaniards upon the Engliss trade, during a long feries of years; while it emboldened the Y enemy, enemy, depreffed the genius of England: until Parliament, roufed by fuch a continuation of infults and indignities, at length vindicated the national honour, and drove the Minister from the fuperintendance of affairs.

The temporifing and pufillanimous counfels of Lord North, in the difpute refpecting the Falkland iflands; and the ultimate termination of it, which left the right undecided, and even afferted by the Court of Madrid, at the fame moment that from motives of political convenience, Spain thought proper to cede the contefted territory to England : thefe humiliating measures, exposed and reprobated by the pen of Junius, ftand in need of no comment, and are fufficiently appreciated by a juft and differing people.

Spain was no longer governed by Charles the Third, at the time when thefe interesting events took place. That Prince, after a reign of above twenty years as Sovereign of Naples, had had afcended the Spanish throne on the death of his brother Ferdinand the Sixth, in 1759; and expired at a very advanced period of life, in December, 1788. His unconcealed diflike of the English nation, from whom in his youth he had received fome fignal benefits, as well as fome painful and perfonal humiliations, had probably induced him, even more than the ties of blood, or connexions of policy with the Court of France, to join that kingdom in two fucceffive wars which she carried on against Great Britain.

To the counfels of his reign, and probably to a fyftematic plan in concert with the Cabinet of Verfailles, for attacking the commerce, and fetting limits to the enterprizes of England on the North Weft coaft of America, we may without injuftice attribute the acts of violence, committed by Don Martinez in the Port of Nootka. The fhort period, comprifing fearcely five months, which clapfed between the death of Charles the Third, and those infractions of the peace previously substituting between Y 2 the the two Crowns, leave no room to doubt that the original orders were iffued during the life of the late Sovereign.

Charles the Fourth fucceeded to the Spanith monarchy under these circumstances. Though of a mature age, his character was little known or underftood beyond the limits of his own dominions. In the early part of his life he had appeared to evince fentiments more Caftilian, than any of the defcendants of Philip the Fifth had hitherto difcovered; and to promife a reign, in which the feelings of a common origin and defcent would influence lefs on affairs of state, than a wife confideration of the true policy and interefts, becoming a genuine King of Spain. It may however be questioned, whether this anticipation of his maxims and fuppofed line of conduct, will be confirmed by experience; and whether he will emancipate himfelf from the partialities, naturally connected with his near affinity to Louis the Sixteenth. The fame Ministers feem to govern, and the fame principles to animate

mate the Court of Madrid, which have uniformly characterized it fince the extinction of the Spanish branch of the House of Austria: and the time is probably still distant, when the pernicious effects of the treaty of Utrecht in uniting two monarchies, which for ages anterior to that event had never acted in conjunction against Great Britain, will have finally ceased to operate.

Meanwhile, the efforts of the First Minifter to terminate the prefent difpute by negotiation, kept equal pace with the exertions made to equip a formidable naval force. At the fame time that a fleet, the command of which was defined to Lord Howe. affembled at Portfmouth, Mr. Fitzherbert was difpatched as ambaffador to Madrid, in order to try the effect of remonstrance and expostulation. The English people, unanimous in their approbation of the meafures purfued, and in their demand of reparation for the injuries fuftained, loudly called for inftant war, or for the most unequivocal and fatisfactory conceffions. The The convultions and embarraffed flate of the French monarchy, together with the perfonal fituation of the King of France, appeared to render an adherence to, or completion of the family compact impracticable, however well inclined the Court of Verfailles might be fuppofed, to affift and fupport her ally.

Spain doubtlefs felt and regretted this incapacity, which compelled her to commence a war against England, unaffifted by any European power; and the event of which, in the prefent circumstances, might be fatal to her grandeur or commerce in every part of the world. She feemed to yield to these obvious confiderations; and the Spanish Ministry towards the close of July, agreed to make a compensation for the loffes, fuftained by the English adventurers plundered at Nootka, as a bafis or preliminary to a final and amicable arrangement. Notwithstanding, however, this apparent defire of adjusting the points in difpute, and of avoiding the ultimate appeal to the fword, every exertion was not only made in

in the ports of Cadiz and Ferrol, to fit out a numerous fquadron; but the Spanish ambaffador at the Court of France, expended the treafures of his mafter, in endeavours to induce the National Affembly to adopt the quarrels of Charles the Fourth, and to fulfil in its whole extent the obligations of the family compact. His labours, though not equally fuccefsful, as, under more propitious circumftances they might have proved, yet produced a vote favourable to the views and wifhes of the Crown of Spain. A general profession on the part of the National Affembly, of adherence to the flipulations formed between the two nations; and a refolution inftantly to arm a confiderable naval force at Breft, were procured and published. The hopes of a fpeedy and permanent accommodation between the Courts of London and Madrid, which the first concession on the part of the latter power had excited, gradually grew more uncertain and problematical. Autumn advanced, without any certainty or decifion on this great point; and though the the fleet of England, which had cruized in the Bay of Bifcay during near fix weeks, returned again to Spithead, without having feen an enemy, yet the expectation of an eventual rupture was rather augmented than diminifhed.

While thefe negociations and armaments detained the West of Europe in fuspense, the most important and unexpected events had taken place among the Princes of the Germanic empire, in confequence of the death of the late Emperor Joseph the Second. That reftlefs and turbulent Prince. exhausted in body, and agitated in mind, expired at Vienna in the commencement of the prefent year. His vaft, but divided and revolted provinces, devolved to his brother Leopold, Great Duke of Tufcany. Few Sovereigns have ever acceded to a throne under more critical and alarming circumstances. Though Laudohn had clofed his brilliant career of military glory, and even fhed a luftre over the laft yours of Joseph, by the capture of Belgrade : though the Turks had been driven beyond 2

beyond the Danube, and the Imperial troops had at length penetrated into Servia and Moldavia; yet these advantages, bought with three campaigns, and preceded by defeats and difasters, offered a very inadequate compensation for the calamities, which menaced or afflicted every other part of the dominions of the Houfe of Auftria. Hungary, fo renowned for its enthusiaftic loyalty and attachment to Maria Therefa, when that Princefs was involved in the deepeft diffrefs, had been alienated by her fucceffor; who infulted their most facred prejudices, while he invaded their most valuable immunities. Posterity will fcarcely believe that this injudicious and infatuated Prince, foon after his acceffion. from refentment to the Hungarians; not only removed the crown and regalia of that monarchy from Buda, the antient capital, to Vienna : but, as a mark of fcorn and contempt, caufed thefe venerable infignia of the kingly dignity, inexpreffibly precious in the effimation of the people, to be conveyed from one capital  $\mathbf{Z}$ 

tal to the other, in the common ftage waggon.

The King of Pruffia hung over Bohemia, with a prodigious army, ready to enter that kingdom. The German Princes were almost universally disaffected to the late Emperor, and had reprobated his infidious projects for an exchange of territory with the Elector Palatine. The Netherlands, irritated by a long feries of oppreffion, confifcation, and violation of all their antient liberties, had renounced any allegiance to a Prince, whom they regarded not as a protector, but a tyrant. Philip the Second, when he recalled the fanguinary Duke of Alva, was fcarcely more detefted, and had not more completely loft the low countries, than Joseph the Second had done. Dalton, though at the head of a regular and formidable body of forces, had been compelled precipitately to evacuate Bruffels, and to feek his fafety in a diforderly and ignominious retreat. Luxembourg alone remained, of all the ten provinces, when Leopold fucceeded fucceeded to his brother; and Flanders no longer even liftened to the propositions of accommodation, which Joseph in his dying moments offered to his revolted subjects.

In this fituation, furrounded with difficulties occafioned by the ambition and defpotifm of his predeceffor, the new King of Hungary, after fome months of delay and irrefolution, wifely yielded to the neceffity, imposed on him by the diftracted condition of his affairs. The Courts of Berlin and of London, acting in concert, and fustained by a Pruffian army, gave law to the Houfe of Auftria. Leopold confented to abandon the alliance of the Empress of Ruffia; to restore to Turkey the territories lately acquired; and to receive his Flemish subjects into favour. after conceding and confirming, in the most extended degree, all their liberties and privileges. This vigorous and fuccefsful interpofition was inftantly followed by a peremptory requisition, on the part of the fame Powers to Catherine the Second, by which that haughty and enterprizing Z 2 Princefs

Princefs was required to follow the example exhibited by the King of Hungary ; and to grant an equitable peace to the Ottoman Porte, as well as to conclude the war which fhe carried on againft Sweden.

From fo humiliating a neceffity, the Emprefs extricated herfelf by one of the moft rapid, unforescen, and perhaps masterly ftrokes of policy, which is to be found in the annals of the prefent century. She made a peace with that King of Sweden, against whom the had not fcrupled, a few years fince, to excite his own foldiers and fubjects to revolt: who had fcarcely efcaped from captivity at Wybourg, by forcing a paffage through the Ruffian fleet, with which he was furrounded ; and who had not only committed hoftilities and waged war upon her empire; but was fuppofed to have drawn his pen against her reputation, and to have accufed her to Europe, and to future times, as an usurper, infatiable in her thirft of power, and deftitute of faith or honour. Only a few days intervened between the most rancorouş rancorous difplay of perfonal enmity, and the folemn exchange of the ratifications of peace: while Catherine, liberated by this fuccefsful exertion from an enemy who detained her fleet in the Baltic, and who might prefent himfelf at the very gates of her capital, affumed new vigour, difdained to fubmit to the mandates of Pruffia, and continued her military operations againft the Turks.

She did not ftop here; but, irritated by the attempt to fetter her arms and limit her conquests, she pressed Gustavus the Third to enter into a confederacy against those powers, with whom he had been fo lately in strict alliance; and to whofe timely interference or good offices, he had been in a great meafure indebted for his prefervation. She negociated anew with the Prince Regent and Cabinet of Denmark, whom the interpolition of England had hitherto reluctantly retained in neutrality. She corrupted, or perfuaded the Polifh Diet to express fentiments hoftile to Pruffia; and encouraged Spain to refufe : 3

refule compliance with the demands of the British Government.

Under thefe circumstances and appearances, hostile or inauspicious to the repose of Europe, the month of October commenced. During its progrefs, the hopes and fears of the nation were painfully fufpended, by the uncertainty of the final event. The impatience and anxiety, natural to, and infeparable from fuch a fituation, were infinitely augmented by the fecrecy and filence, which furrounded and concealed the operations of the cabinet. The powers and energies of Government, concentered round the First Minister, and vested in his perfon, exhibited to the English nation, all the vigor, celerity, and decifion of a defpotifm, unaccompanied with its characteristic and concomitant evils. Though the fine ft and most numerous fleet which Great Britain had ever equipped, lay at Spithead, ready to stand out into the Atlantic upon the fhortest notice: though Admiral Cornish, at the head of eight fhips of the line, had already fet fail ;

fail; and, favored by an eafterly wind, was clear of the Channel: though a detachment of the Guards, to the number of above two thoufand men, were under orders to march to Portfmouth; and every preparation was made to facilitate their prompt embarkation: though the blow which impended over the Spanifh monarchy, hung by a fingle thread, and might every inftant fall; yet, not a whifper transpired, to gratify the curiofity of an eager capital, and an expecting country.

Univerfal ignorance, or fanciful conjecture prevailed, refpecting the deftination of thefe powerful naval and military armaments; while the magnitude and fcattered position of the Spanish dominions, from the mouth of the Mississippi to that of the river Plate, left an ample field for the imagination, and afforded fcope for unbounded affertion. To those who recollected the delays, the publicity, and the timidity which degraded the counfels, and frustrated the measures or

# ( 176 )

or exertions of England, during the Ådminiftration which conducted the American war, the prefent contraft was matter of equal wonder and admiration. The nation, confcious that its honour and its interefts were committed to a a depofitary of transfeendent integrity and firmness, patiently waited the winding up of the catastrophe, with eyes fixed on its conductor. Opinion fluctuated rapidly and capriciously from war to peace, as the most trifling events appeared to indicate the one or the other; and October expired as it had begun, in uncertainty and fufpence.

During the three first days of the fucceeding month, as every hour might be supposed to decide on this momentous question, expectation feemed to have attained its highest point; while the rapid approach of that period, when Parliament was summoned to meet for the dispatch of public business, and the advanced feafon of the year, superadded to the length of time which had already elapsed fince the the commencement of the negotiation, appeared to preclude the poffibility of any further delay. It was not till the fourth of November, a day already rendered memorable and aufpicious in the annals of Great Britain, that the meffenger fo long expected, arrived with pacific intelligence. Spain, after a refistance proportioned to the magnitude and importance of the objects contested, and after peremptory and reiterated refufals to concede upon points, equally affecting her pride and her interefts; relaxed at once from this tone, complied with the demands of England, and figned a " Convention," which terminated every paft or prefent caufe of dispute between the two Crowns.

To the wifdom and moderation of the Spanish First Minister, the Count de Florida Blanca, this timely and temperate refolution, which arrested the fword already unsched, was attributed, by an opinion, not only general, but unqueftionably fuscained on high authority and A a evidence.

# ( 178 )

evidence. If the hiftorian was permitted to fpeculate upon the events of futurity; or if, from afcertained and exifting facts or circumftances, we might be allowed to predict refpecting those which would have taken place; it is more than merely probable, that Spain must have fustained very deep and lasting injury from that war, which was thus unexpectedly and fuddenly averted.

The naval power of England, which at no period of past time, had ever been fo expeditioufly or vigoroufly called into action : the fpirit and unanimity which prevailed throughout the kingdom: the acknowledged energy and capacity of the Administration : the very nature of the war in which we were ready to engage, which muft have been not only offenfive, but directed to parts of the globe peculiarly calculated to inflame the ardor of the affailants, by profpects of wealth and plunder : the defenceless and unprotected state of many of the Spanish colonies in both hemispheres : the anarchy, and confequent incapacity of

of France, to extend any prompt and effectual fupport to the Crown of Spain: even the lefs important, but diftrefsful and perplexing embarraffments, refulting from the earthquake which demolished the fortrefs of Oran upon the coast of Africa, almost precifely at the fame time when the Emperor of Morocco commenced hoftilities against the Catholic King : this combination of caufes or events, in which there appears to be no exaggeration, may perhaps, without the imputation of national partiality, justify an opinion, that the Spanish monarchy was fnatched by the wife and yielding policy of its Minister, from evils and calamities of no common defcription.

While, however, I anticipate thefe advantages, which might probably have refulted from war, under the circumftances already enumerated; it is unqueftionable, that to a country fo deeply involved in debt, no feries of conquefts which the wildeft imagination can fuppofe, had they even been realized, could have compen-A a 2 fated

# ( 180 )

fated for the misfortunes infeparably connected with hostilities. Peace, even though only obtained upon the most moderate, and barely equitable terms, must, to every reflecting mind, have been far preferable to the acquifition of all the provinces, which Cortez ever conquered, or Pizarro fubdued. But the " Convention" recently figned, while on one hand it made ample reparation and restitution to the injured Crown, and plundered fubjects of Great Britain; on the other, opened new and unexplored fources of wealth and commerce. After having been fubmitted to the infpection and investigation of the people of England, during many weeks : after having received the most authentic attestations of public gratitude and fatisfaction, in addreffes to the Throne, from the great corporate bodies of London, Edinburgh, and Briftol; neceffarily composed of perfons highly fenfible to, and highly enlightened upon, the commercial interests of the country: after having been finally difcuffed cuffed with all the feverity of political criticifm, in the two Houfes of Parliament, and attained the fanction of decided approbation in both : having undergone thefe rigorous difquifitions upon its merits, the "Convention" may be examined, like any other fact in the English annals, with the candour, impartiality, and temper of hiftory.

That Great Britain has obtained by it points and objects, hitherto referved or refufed by the Court of Madrid, in every treaty fince the termination of the reign of Philip the Fourth, is incontestible. Time alone can completely afcertain the value and intrinfic worth of these conceffions, which are, in a great degree, dependant on the industry and enterprize exerted, in converting them to national advantage. That jealous and tenacious power, which originally difcovered and conquered the New World, over which fhe has always endeavoured to draw the deepeft veil, while fhe excluded every European flate from any participation in her vaft

vast acquisitions; has, for the first time, receded from her high and exclusive pre-The pretended donation of the tenfions. See of Rome, and all the antiquated claims which long prefcription had rendered venerable, have been for ever relinguished and abandoned by the prefent Convention. The navigation of the Pacific Ocean is, in effect, declared to be as free as that of the Atlantic. The right, claimed by England, of purfuing the fifthery on those parts of the coaft of South America, unoccupied and uncolonized by Spain, is not only avowed : but a vaft tract of the Magellanic regions, on either fide of Cape Horn, comprizing the whole coaft below the most fouthern fettlement already made by the Spaniards, is declared to be free to both countries, for every purpose of temporary accommodation; while the two Crowns are equally interdicted and restrained, from forming future permanent eftablishments on that inhospitable shore. In return for this liberal and ample conceffion, England fubmits to the equitable

ble demand, of not permitting her veffels to approach within ten leagues of the coafts and countries, actually occupied by Spain upon the Pacific Ocean.

On the North Weft Coaft of America, the original difcovery, occupancy, and fovereignty of which, appear to furnifh matter of infinite doubt and difcuffion, ftill greater advantages are fecured by the Convention. Withoutrecapitulating the primary ground of difpute, upon which clear and immediate fatisfaction is ftipulated: the whole continent, north of the fettlements already poffeffed by Spain, is left open to both nations; with only a reciprocal right of entry for purpofes of trade, into the ports or places which either may occupy.

The fame general and equal principle is laid down as the bafis of accommodation, in the fouthern and northern hemifphere, and forms the predominant feature of the treaty. It was not denied by the Minister, and it was justly afferted by his opponents, when the Convention was agitated in the House of Commons, that to render

# ( 184 )

render it perfect, and exempt from future poffible mifinterpretation, a precife limit should have been drawn, both on the coast of North and South America. But the evils infeparable from a prolongation of the difpute, must have fo greatly outweighed the benefit to be derived from any line of demarcation which could have been inftantly fettled, that no poffible cenfure can be affixed on that account; fince its expediency was not more obvious, than its immediate execution was difficult and impracticable. Nor can it be reafonably doubted, that where fo clear a principle is by mutual confent established, no essential obstacle can arise. in the courfe of future negotiations between the two Courts, for the final fettlement of their respective boundaries.

To complete this great act of public benefit and national glory, it only remained to meet the expence occafioned by it, with promptitude and alacrity. The Minister, fo far from avoiding or protracting that neceffary, but painful and arduous task, followed the Convention, with the immediate diate production of the accounts respecting the naval and military armaments, and the pecuniary impositions which he meant to propole for their fpeedy liquidation. Not more diftinguished by the magnitude and energy of his preparations to humble the monarchy of Spain, when war appeared inevitable; than charactarifed by the most falutary and fevere œconomy, when that neceffity no longer exifted; his enlarged and active mind overcame the difficulties, by which common statesmen are impeded. He proposed to raife, not merely the interest of the debt recently incurred; but to extinguish the principal itfelf, in the space of four years, though amounting to above three millions fterling. The effect of fo judicious and provident a meafure, which must equally evince the magnanimity of the Minister from whom it originated, and the refources of the country which adopted it, will be felt through every kingdom of Europe. It is not exceeded by any of the acts of wifdom, found in the annals of Eliza-ВЬ beth. 5

. .

beth, when the counfels of England were directed by the forefight and policy of a Burleigh. It is without precedent fince the beginning of the prefent century, and is calculated to excite the admiration and incredulity of future times.

The day, upon which Mr. Pitt fubmitted to Parliament a fyftem, fo calculated for general advantage, was diffinguifhed by another act, which might have rendered illuftrious a perfon, lefs confpicuoufly eminent above his fellow citizens. The garter, which was conferred by the Sovereign upon Lord Chatham, evinced the indifference or fuperiority of the Minister to the higheft external decoration and diftinction; as powerfully, as his renunciation of a lucrative office in favour of Colonel Barré, at a much earlier period of his administration, had proved his difintereftednefs and contempt of emolument.

As it feems hardly poffible to have made greater facrifices, fo perhaps, it is difficult to felect any example in modern times, of fo early an acquifition of that glory

glory, which is the just reward of rectitude and talents. Whether the names of Clarendon, of Godolphin, or of Pelham, can be placed in any degree of comparison or competition with that of Pitt, it may be left to posterity to determine. But it is competent to the hiftorian of the prefent age, to affert and to prove, that at no period fince the reftoration of monarchy in the perfon of Charles the Second, has this country permanently attained to fo high a point of folid greatnefs and importance, as fhe enjoys at the prefent moment. We should fearch in vain for any traces of national confideration or honor, in the profligate annals of that diffolute and dependent Prince, whom I have just named; or in the bigotted and transitory reign of his lefs criminal, but more unfortunate fucceffor. Shall we difcover greater fubject for pride and exultation, even under the temperate and elective government of William the Third?

Whatever obligations we may owe to the Prince of Orange, as our deliverer B b 2 from

### ( 188 )

from civil and fpiritual tyranny, his arms were conftantly reftrained by the Generals, as his measures were uniformly defeated by the policy and power, of Louis the Fourteenth.

After a perpetual and unequal ftruggle, in which her commerce was almost annihilated, and in which the folitary laurels of the Boyne and of La Hogue, were contrasted with the annual defeats received on the Continent, and in the Channel, Great Britain nearly funk under the exertion. Though the peace of Ryfwick produced a fhort and delufive calm, yet the Crown of Spain, in violation of the most folemn renunciations, was quietly transferred, in the year 1700, on the extinction of the Spanish branch of the Houfe of Austria, to a Prince of France: while the laft hours of William were occupied by ineffectual efforts, to prevent the fatal confequences of an act. incontestably injurious to, or fubverfive of the fecurity, interefts, and greatnefs of England.

It must be admitted, that the female reign

reign which fucceeded, fo long as it was conducted by the counfels of Godolphin, and the genius of Marlborough, prefents a friking picture of military glory, and fucceffive triumphs. The Court of Verfailles, accuftomed to confer.condefcended to folicit for peace; and Torcy, at Gertruydenburg, in 1709, exhibited the humiliating fight of a Minister of Louis the Fourteenth, proftrate before England and Holland. But the imprudence or prefumption of an Administration, intoxicated with profperity, and unmindful of the changes of human affairs, allowed the moment to elapfe, in which the fafety and interefts of their country might have been for ever fecured, on the most durable foundations. The horizon foon became darkened, and the profpect obfcured by clouds.

Villars refcued France from her ftate of danger and diftrefs, while Oxford and Bolingbroke difgraced the government, and accelerated the death of their feeble miftrefs, by measures of pufillanimity, and breaches of national faith. The trophies trophies of Blenheim and of Malplaquet were obliterated by the defeat of Denain, and the peace of Utrecht: the Houfe of Auftria was betrayed in that difhonourable treaty; and the evening of a reign, fo diffinguifhed and fo fplendid, clofed in weaknefs, and is only recollected with regret.

If the annals of the laft Princefs of the Stuart line afford fo little matter for hiftoric praise, it is not in the labyrinth of Continental Politics and alliances, which characterifed and composed those of George the First, that we can look for topics of eulogium, or fubjects for admiration. The naval victory, obtained by Byng in 1718, over the Spanish fleet in the Faro of Meffina, however brilliant and decifive; fo far from being productive of any advantage to the nation, counteracted every principle of wife and judicious policy. It stands contrasted with the fatal bankruptcy of the South Sea year; with the melancholy facrifice of Hofier's devoted fquadron, under the walls of Porto Bello; with a dereliction of the interefts

terefts and honour of the Crown of England, rendered fubfervient to injurious predilections, and foreign acquifitions.

The commencement of the reign of George the Second, conducted, as the greater part of that of his father had been, by the counfels of Walpole, difcloses fcarcely a more exhilarating profpect. It was, indeed, pacific : but this peace was the ignominious and fupine infecurity of James; not the dignified and martial tranquillity of Elizabeth. I am at a lofs to find, in the prefent century, any portion of time lefs diftinguished by wifdom and vigor; or during which, Great Britain was fallen into more complete infignificance, than in that interval which elapfed from the death of George the First in 1727, to the close, of Sir Robert Walpole's administration, in 1742. Though the fubfervient fleet of this country efcorted the younger fon of Philip the Fifth, from Barcelona into Italy : though we facilitated and advanced the grandeur of the House of Bourbon : though we tamely fubmitted to 2 the

the acts of violence, exercifed by Spain against our commerce in all the American feas: though we abandoned the Emperor Charles the Sixth, to the united force of France, Spain, and Sardinia, who difmembered Naples and Sicily from the dominions of the Houfe of Austria, in so unequala conteft: though, in order that the measure of incapacity and mifconduct fhould be complete, we even permitted Louis the Fifteenth, by incorporating the Dutchy of Lorrain with his hereditary poffeffions; to cement and perfect the French greatnefs ; yet thefe mighty and numerous conceffions did not conciliate affection, or procure refpect. Verfed in the arts of Parliamentary addrefs, and the fcience of domestic venality, but confcious of his incapacity to conduct the veffel through the form which impended; Walpole, when he had exhausted every endeavour, to detain his Sovereign and his country in difgraceful neutrality, reluctantly refigned the reigns of power, which he had held too long for the honor of his master, or the glory and advantage of England.

Pelham,

Pelham, after a short interval, fucceeded. His Administration, though neither fortunate and fuccefsful in war, nor fecure and undifturbed in peace, yet was rendered respectable, by the lustre of his private and perfonal virtues. The inglorious campaigns of Fontenoy, and of La Feldt: the defeats of the allied army in Flanders, followed by the capture of Bergen-op-Zoom, and the fiege of Maeftricht: the peace of Aix la Chapelle, humiliating and injurious to Great Britain : the ravages, or hostilities, continued to be exercifed by France against our colonies in America and the East Indies. even fubfequent to that treaty : thefe fubjects of general complaint and diffatisfaction, which clouded the Ministry of Pelham, confoled the nation for his lofs, when removed by death in 1754, from the fuperintendance of public affairs.

The fhort remainder of the reign of George the Second, was equally calamitous and difgraceful, 'till that memorable and brilliant, but transitory æra, preceding C c its

its final termination, when the genius of Pitt renewed the glories and fucceffes fo long forgotten. The lofs of Minorca, and the ignominious convention of Clofter-feven, were erafed by the fucceffive conquests of Martinico, Canada, Plaffey, Beflifle, and the Havanna. But, the demife of the Sovereign, in 1760, and the transfer of ministerial authority which fucceeded, prevented the beneficial confequences, naturally to have been expected from this chain of victories. A peace, which never can be fufficiently reprobated, and in which the ignorance of the interefts of the nation, was only exceeded by the dereliction of the honor of the Crown, reftored to the two branches of the Houfe of Bourbon, those provinces and poffeffions, of which they had been deprived by the Earl of Chatham.

I fhall not enumerate the fleeting phantoms of Administration, which annually appeared and vanished; nor attempt to defcribe that period which elapsed, from the refignation of Lord Bute, to the year 1770, when the reins of power were delegated to to Lord North. There are certainly few events, included within that portion of time, which can induce us to lament that it was not of longer duration. With ftill greater reafon, I with to draw a veil acrofs the feries of errors, incapacity, and mifconduct, which preceded and produced that fatal war, terminated by the emancipation of America; and which ftill blazed in every quarter of the globe, at the æra when thefe memoirs commence.

From the elevation on which we are placed, it affords a fort of melancholy pleafure, to look down upon the anarchy and calamity, which endear the prefent Government, by a comparison with that ftate from which we have escaped. The actual fituation of this country realizes the warmeft with of a Minister, or a Sovereign, towhom the profperity and glory of England are fupremely dear. That object which William vainly fought to attain; which Godolphin and Marlborough allowed to efcape; and which the Earl of Chatham was not permitted to accomplifh; has Cc2 been

# ( 196 )

been referved for the prefent age to behold. The monarchies of France and Spain have been fucceffively humbled and reftrained, without the neceffity of having recourfe to the fword. Great Britain, at the conclution of 1790, is become by general confent, theacknowledged Arbitrefs of Europe; and to her posseffion of external confideration and respect, unites every internal fource of wealth and felicity.

From the furvey of fo august and animating a fcene, it is natural to turn our eyes towards the picture exhibited by France, at the prefent moment. The convulfions which have agitated that diffracted country fince the month of October 1789, though fometimes apparently fufpended or extinguished, yet may possibly revive with augmented violence. The last fourteen months feem to have been alternately diftinguished, by acts of festivity and of flaughter; by the pageant of a Fæderation, in the "Champ de Mars" at Paris, where the national freedom was folemnly recognized by a captive and degraded Sovereign ;

reign; and by the memorable carnage of Nancy, which fo quickly followed. It is perhaps impoffible for the wifeft statefman to predict the eventual confequence of these conflicting causes; or to hazard a decided opinion on the final refult, as yet concealed in futurity, and obfcured by fo many contradictory appearances. The depreffion and humiliation of the clergy; the fale of the ecclefiaftical property ; the annihilation of the orders of nobility, which were almost coeval with the times of Clovis and of Pharamond; the abolition of the peerage; the renewal of the dangerous experiments of Law, and the creation of a paper currency, nearly as defitute of folid fupport, as was the fyftem of that celebrated minifter : Thefe extraordinary operations, or meafures of government, in a great degree without precedent in the hiftory of modern European nations, have not yet fufficiently unfolded and developed their full effect, to enable the philosopher and the hiftorian to confer on them his cenfure, or his admiration.

( 198 )

It has not even hitherto been ascertained or exemplified, fince the extinction of the Roman freedom by Marius and Sylla, that a people whofe numbers exceed twenty millions, are capable of being permanently governed under a free conflitution. Nor has mankind yet feen any inftance of a capital, and a country, habituated for ages to defpotifm, funk in pleafures, loft to public principle, destitute even of the forms of external respect for the national religion, and only intoxicated with the fpeculations of a diftempered and visionary philosophy, which ever afpired or attained to a wellregulated and wifely-cemented Liberty.

It was not in fuch a ftate of morals or of fociety, that the Athenians broke the fetters of arbitrary power, when roufed by Harmodius and Ariftogiton. The elder Brutus bore no fimilarity either to Mirabeau, or to La Fayette. Rome vainly affaffinated her Dictator, when public virtue was no longer to be found in the fenate, or among the people. The Mountaineers of Switzerland, who threw off the

the yoke of the Houfe of Auftria; and the oppreffed peafants of the Low Countries, who revolted from the tyranny of Philip the Second, were poor, hardy, and martial. The English Parliament, which oppofed, and ultimately vanquished Charles the First, called upon a nation, which however inflamed by fanaticifm, was unfubdued by luxury, and uncorrupted by venality. Times of effeminacy and refinement have not hitherto been found to produce a plant, of fo hardy and vigorous a nature, as Freedom: and if we are defined to fee in the hiftory of France, an example of this extraordinary contradiction to the refult of all experience, it will be a firiking leffon of the infufficiency and fallibility, of human wifdom or obfervation.

The time which has elapfed fince the Revolution of July, 1789, has not been fufficient, to afcertain all its confequences, or to ripen and mature the many caufes, which may still shake the freedom of France, before it attains to folidity. The yielding and and paffive conduct of the King, which has fo powerfully operated to produce fubmiffion in the two orders of the nobility and clergy, may be overborne by events, or may be affected by the advice and counfels of those who approach his perfon. The natural levity, and characteriftic inconftancy of the nation, may conduce to make them weary of a poffeffion, which however ineftimable in its nature, is neither to be attained, nor preferved, without unremitting vigilance and exertion. The ceffation or ruin of many branches of trade, neceffarily refulting from the late convultions: the feverity of the taxes, which a free Government is compelled to exact, in common with the most defpotic Monarch : the long habits of unconditional fubmiffion, fo forcible in their operation upon the mind and character: All these principles may ferment, and ultimately burft into action.

To the internal fources of change and commotion, external ones may unite. Of the feven fugitive Princes of the Blood, who pre-2 cipitately

cipitately abandoned their country at the commencement of the national troubles. only one, the Prince of Conti, has yet ventured to revisit Paris, or fubmitted to take the Civic Oath, imposed by the new conflitution. The malcontents, affembled at Turin round the perfon of the Count d'Artois, aided by the capacity and refources of Calonne, and ready to be led on by Maillebois, menace the duration of the National Affembly. Even though thefe ftorms were diffipated, yet the Courts of Vienna and Madrid cannot be fuppofed to look with pleafure, or approbation, on the fallen condition of Louis the Sixteenth; and would, probably, aid with more than withes, any effectual ftruggles which might be made for the reftoration of his antient prerogatives. These reflections and confiderations may infpire fome reasonable doubt, respecting the final iffue of the fubverfion of the Royal Power, and the permanency of a free conflitution in France. orth the

Whatever may be the refult, and though liberty fhould even ultimately triumph, D d its its attainment has been accompanied with, at leaft, a temporary diminution, approaching to total fuspension, of the political frength, importance, and confideration of the kingdom, as a European state. The energy and activity of the Crown have been withdrawn; and a fpirit of licentiousness, the most fatal to every national and public effort, has prevailed throughout all the naval and military departments. The French colonies in the Weft Indies are engaged in civil war, or become a prey to infurrection and anarchy. The frontiers, towards Germany, Savoy, and Spain, are either exposed to infult and invafion; or protected by troops, upon whofe steady attachment and fidelity, after the late defection from their Prince, no fecure reliance can be placed. That powerful monarchy, which for near a century and a half has infpired terror. and whole reftless ambition has been fo dangerous to every furrounding country : which has twice, during that time, nearly fubjected Holland; which placed Philip the Fifth on the Spanish throne in 1700, and

and raifed an Elector of Bavaria to the Imperial dignity, at a still more recent period : that power, occupied in endlefs metaphyfical difquifitions upon the rights of men, or employed in desperate projects of revenue and finance, appears not only to be incapable of invading the repose of her neighbours, but even of providing for her own internal fafety and tranquillity.

Such is the striking contrast, which the two monarchies of France and England actually prefent. The one, ftruggling through difficulties, to complete a fystem of liberty; and attempting to renovate her difordered finances, plunged into almost irremediable confusion. The other, enjoying all the advantages of eftablished order; conducted by a Government equally vigorous and popular; meeting every pecuniary embarraffment or imposition, with new and unexampled refources; ftrengthening her credit, and extending her commerce, while she covers the ocean with her navy, and fpreads the glory of her name over every quarter of the earth. · 1 ·

Lam

## ( 204 )

I am arrived at that period, where the prefent work must necessarily terminate. I am confcious that it is only an outline; but the events of which I have treated, are not fufficiently removed, to admit of minute enquiry, or profound investigation. Yet, this imperfect production may perhaps ferve onto light the steps of some future Hume or Gibbon, to whom genius shall delegate the fublime talk, of recording and perpetuating the English annals. My object has been only to commemorate the facts and characters, which have made the deepeft, impression, on, my, memory [ and understanding, while a fpectator of their full effect ; and to famp them with the genuine fentiment which they excited, of approbation or cenfure. "Statuires gestas Populi Romani, "fays Salluft, 16 carp-" tim, ut quæque memoria digna vide-" bantur, perfcribere; eo magis, quod " mihi a Spe, Metu, partibus Reipublica, " animus liber erat.", ...t slider ......

Whether I may be efteemed altogether exempt from the emotions, difclaimed by the the Roman writer, I must leave to those who shall perufe this work; to determine. It is difficult to divert ourfelves of the predilections, which almost necessarily arife in our minds, when engaged in the recital or defcription of fcenes, acted in ages and countries the most remote. It would rather imply a degree of apathy, and defect of feeling, than any fuperiority to common and vulgar prejudice, if I could furvey with the fame tranquillity, the calamities, which only a few years fince, threatened the deftruction of England, and the prefent elevated state of fecurity which we enjoy : or if in relating them, I fhould allow no portion of enthulialm to mix with the veneration, always due to historic truth. Gratitude is naturally excited in every generous breaft, by private benefits: but the Sovereign, or the Minister, who are the benefactors of nations, kindle, even in the historian who transmits to future times the events of their government, a venial partiality; nor can the reign

reign of Trajan and Aurelius be written with the fame indifference, as we feel in defcribing the gluttony of Vitellius, or the crimes of Caracalla.
